MISSION STATEMENT

Our mission is to prepare students to be productive and responsible members of a democratic society by promoting excellence through academic achievement.

VISION STATEMENTS

- In our school our teachers will be permitted to exercise professional judgment reaching common curriculum goals.
- Our school and our staff will support and collaborate with each other, working collectively to educate our students.
- Students are recognized as individuals and encouraged to take ownership of their future, their learning, and their school, by making decisions that are productive for themselves and society.
- Our school will be a place where all “Spartans” feel a sense of pride, ownership, and safety.
- We will seek more support from parents and the community at large for our efforts to promote student responsibility and achievement.

DISTRICT POLICY AGAINST DISCRIMINATION

It is the policy of the Francis Howell School District not to discriminate on the basis of race, sex or disability status in its educational activities or employment practices. Inquiries related to race or sex discrimination should be referred to the District’s designee for Title VI and Title IX compliance. Inquiries related to disability status should be referred to the Director of Alternative Learning. Their offices are in the Francis Howell Administration Building, 4545 Central School Road, St. Charles, MO 63304, (636) 851-4000.

PUBLIC NOTICE

All responsible public agencies are required to locate, evaluate, and identify children with disabilities who are under the jurisdiction of the agency, regardless of the severity of the disability, including children attending private schools, children who live outside the district but are attending a private school within the district, highly mobile children, such as migrant and homeless children, children who are wards of the state, and children who are suspected of having a disability and in need of special education even though they are advancing from grade to grade. The Francis Howell School District assures that it will provide a free, appropriate public education (FAPE) to all eligible children with disabilities between the ages of 3 and 21 under its jurisdiction. Disabilities include autism, deaf/blindness, emotional disorders, hearing impairment and deafness, mental retardation/intellectual disability, multiple disabilities, orthopedic impairment, other health impairments,
specific learning disabilities, speech or language impairment, traumatic brain injury, visual impairment/blindness and young child with a developmental delay.

The District assures that it will provide information and referral services necessary to assist the State in the implementation of early intervention services for infants and toddlers eligible for the Missouri First Steps program.

The Francis Howell School District assures that personally identifiable information collected, used, or maintained by the agency for the purposes of identification, evaluation, placement or provision of FAPE of children with disabilities may be inspected and/or reviewed by their parents/guardians. Parents/guardians may request amendment to the educational record if the parent/guardian believes the record is inaccurate, misleading, or violates the privacy or other rights of their child. Parents have the right to file complaints with the U.S. Department of Education or the Missouri Department of Elementary and Secondary Education concerning alleged failures by the district to meet the requirements of the Family Educational Rights and Privacy Act (FERPA).

The Francis Howell School District has developed a Local Compliance Plan for the implementation of State Regulations for the Individuals with Disabilities Education Act (IDEA). This plan contains the agency’s policies and procedures regarding storage, disclosure to third parties, retention and destruction of personally identifiable information and the agency’s assurances that services are provided in compliance with the General Education Provision Act (GEPA). This plan may be reviewed at the Francis Howell School District Alternative Education Department from 8:00 to 4:30 p.m. each school day.

### SPECIAL SERVICES

The Francis Howell School District offers a broad range of services to accommodate the special educational needs of students in the community. Please refer to the special services section of the course listings for a complete list of available services.

Prior to the student receiving special education services, an individual comprehensive evaluation in the areas of intelligence, behavior and related areas must be completed. Before placement is final, an individual education program must be developed and parental permission secured.

### EDUCATIONAL SUPPORT COUNSELING

Guidance Counselors have the option of requesting additional support/counseling for students from the Educational Support Counselor in the building. Requests for services are based on personal, social and emotional needs which may include behavioral or attendance concerns.

### FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

The Francis Howell School District complies fully with the Family Educational Rights and Privacy Act (FERPA). FERPA is a federal law that affords parents and students 18 years of age or older (“eligible students”) certain rights with respect to the student’s educational records. These rights are:

1. To inspect and review official school records and data directly related to your child. Procedures for inspection will be explained to you at the building principal’s office.
2. To a hearing to challenge the content of your child’s records for the purpose of correcting or deleting inaccurate, misleading or otherwise inappropriate data contained there.
3. To give or withhold written consent before personally identifiable records are released to certain persons or agencies.
4. To be notified when records directly related to your child are subpoenaed by a court or otherwise.
5. To register complaints with the department of Health Education and Welfare if you believe your rights as enumerated above, are being violated.

### CONTINUITY AND EDUCATIONAL PLANS

We continue to stress the continuity of the high school experience and importance of educational planning. The freshman and sophomore years will establish a solid foundation of basic studies and required courses. The junior and senior years will allow greater flexibility for the student and family to choose from several broad areas of study: College Preparatory, Technical/Vocational, Occupational (Work/Study) and General.

**College Preparatory Courses**

Provide students the opportunity to prepare for entry into a college setting.

**Technical/Vocational Courses**

Provides students the opportunity to select a program from the Lewis and Clark Career Center. Entry into a technical or vocational field upon graduation is the primary goal.

**Occupational (Work/Study) Programs**

Provides seniors the opportunity to prepare for general employment in a chosen field upon graduation. Available areas of study include: Business/Cooperative Work Experience, Marketing/Cooperative Work Experience, and Culinary Work Experience.
General Course Study
Provides students the opportunity to complete the minimum requirements for graduation and prepare for a variety of career choices, including: vocational or technical training, the military or two-year degree and certificate programs. Additional “select” courses might be required by a college or technical school in a particular field or program. Therefore, students are encouraged to consult their individual counselor on a frequent basis to insure successful progress toward graduation in their respective choice of studies or programs.

COURSE DESCRIPTION INFORMATION

UNIT OF CREDIT

One unit of credit is awarded for the successful completion of a year-long course. One-half unit of credit is awarded for successful completion of a semester course. Credits are awarded at the completion of each semester. Credit will not be awarded by quarter.

REQUIRED COURSE

A required course is one that either the State Department of Education or the Francis Howell School District requires for graduation. All required courses must be successfully completed prior to graduation.

NORMAL PROGRAM

Each student is expected to make continual progress toward graduation requirements. Keeping in mind that the graduation requirements are minimum standards, a normal program will be considered to be six units of credit per year.

ELECTIVE

An elective course is one that a student chooses to take but is not specifically required for graduation.

PREREQUISITE

A prerequisite course is one that must be successfully completed before another related course may be taken. (Example: Accounting I must be completed before enrolling for Accounting II).

HIGH SCHOOL GRADUATION REQUIREMENTS

A student must complete a minimum of 24 units of credit to graduate.

<table>
<thead>
<tr>

<tr>
<td>Social Studies</td>
<td>3.0</td>
</tr>
<tr>
<td>Science</td>
<td>3.0</td>
</tr>
<tr>
<td>Fine Arts</td>
<td>1.0</td>
</tr>
<tr>
<td>Physical Education</td>
<td>1.0</td>
</tr>
<tr>
<td>Health</td>
<td>0.5</td>
</tr>
<tr>
<td>Personal Finance</td>
<td>0.5</td>
</tr>
<tr>
<td>Electives</td>
<td>7.0</td>
</tr>
</tbody>
</table>

REQUIRED COURSES FOR GRADUATION

Communication Arts: English I, English II, English III, and one credit from Communication Arts electives.
Math: Any 3 full Math credits
Social Studies: United States History, Modern World History, American Government
Science: Physical Science, Biology, Science elective
Fine Arts: includes Art, Music, and Theatre (one unit of credit)
Practical Arts: includes Business, Family and Consumer Science, Industrial Technology, Lewis & Clark Vocational Career Center, Yearbook Publication, Newspaper Production, Photojournalism (one unit of credit)
Personal Finance: This course satisfies ½ of the required Practical Arts 1.0 unit. Courses for personal finance will be offered in the Family and Consumer Science as well as Business curricula (1/2 unit of credit)
P.E.: (one unit of credit)
Health: (1/2 unit of credit)

HIGH SCHOOL CREDITS EARNED WHILE IN MIDDLE SCHOOL

Due to a change in BOE Policy 2525, students who successfully complete a high school course while in middle school will have the course recorded on their high school transcript for G.P.A. and credit notation. These courses include, but are not limited to, the following:
- Algebra
- Challenge Science 8 (same as Physical Science Honors)
- French 1
- German 1
- Spanish 1

Note: Students who enrolled/completed these courses in middle school prior to the policy change (November 2013) will have the choice of “opting-in” for the G.P.A. and credit notation.

CORRESPONDENCE CREDIT

Credit from accredited correspondence/on-line schools may be applied toward meeting Francis Howell School District graduation requirements. Before enrolling in any such coursework, students should first check with their guidance counselor to be certain that the institution is accredited by a reputable agency, and that the course selections will meet designated graduation requirements. These courses are taken at the expense of the student.
**MISSOURI VIRTUAL INSTRUCTION PROGRAM (MoVIP)**

The Francis Howell School District participates in the Missouri Virtual Instruction Program (MoVIP). Through the MoVIP program, District students have the opportunity to participate in tuition-paid online courses in a variety of content areas, grades 9-12. **Students and their parent(s)/guardian(s) are strongly encouraged to meet with their guidance counselor before enrolling in any MoVIP course.**

The District will accept all MoVIP high school course credit earned in grades 9-12. District staff members will assign a grade depending upon the percentage of work satisfactorily completed for each MoVIP course. In awarding credit and assigning grades, the District will apply the same standards for credit award and grade assignment as are applied to courses completed in the District’s traditional curriculum. Again, students and their parent(s)/guardian(s) should meet with their guidance counselor before enrolling in any MoVIP course to be certain that the course selection(s) will meet designated graduation requirements. **These courses are taken at the expense of the student.**

**GRADE POINT AVERAGE**

The following scale is used to calculate the grade point average (GPA) each semester:

<table>
<thead>
<tr>
<th>Course Grade</th>
<th>Regular Class</th>
<th>Honors Class</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90 – 100%</td>
<td>4 points</td>
</tr>
<tr>
<td>B</td>
<td>80 – 89%</td>
<td>3 points</td>
</tr>
<tr>
<td>C</td>
<td>70 – 79%</td>
<td>2 points</td>
</tr>
<tr>
<td>D</td>
<td>60 – 69%</td>
<td>1 point</td>
</tr>
<tr>
<td>F</td>
<td>0 – 59%</td>
<td>0 point</td>
</tr>
</tbody>
</table>

- Current grade point average = the average of the course grades for all courses taken that semester only.
- Cumulative grade point average = the average of the semester grades for all courses taken during high school.
- Each class with a passing grade (any grade higher than an “F”) = ½ credit per semester

**HOW SEMESTER GRADES ARE COMPUTED**

<table>
<thead>
<tr>
<th>Grade Component</th>
<th>Weightage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quarter Grade</td>
<td>40%</td>
</tr>
<tr>
<td>Quarter Grade</td>
<td>40%</td>
</tr>
<tr>
<td>Semester Exam</td>
<td>20%</td>
</tr>
<tr>
<td>Semester Grade</td>
<td>100%</td>
</tr>
</tbody>
</table>

**CUM LAUDE PROCEDURES**

**Requirements to be eligible for Cum Laude Awards:** Students must accumulate a minimum of 27 credits at graduation, unless prorated due to Advanced Standing acknowledgement of high school level coursework successfully completed before grade nine (see NOTES below). Only high school courses (including virtual instruction courses such as MoVIP) qualify for Cum Laude credit. Classes taken through dual enrollment, correspondence, night school or in grade eight or below do not meet this standard.

**NOTES:**

1 - Students transferring from other school districts must have taken the maximum amount of credits available at their previous school(s) and then meet the above credit requirements prorated for the period they attend high school in the District.

2 – While high school credit is not awarded for college credit earned through dual enrollment, or for high school level coursework completed before grade nine, it may be necessary to prorate the number of credits required for Cum Laude distinction for those students entering ninth grade with Advanced Standing acknowledgement on their transcripts. Students who successfully complete the highest level of District coursework available in any of the four core subject areas may petition to dual enroll at a local college or university in order to take more advanced courses in said subject area(s). District schedule allowances may be necessary to accommodate these dual enrollment situations, and the Cum Laude total credit requirement may be prorated as a result.

Cum Laude GPA requirements are:

- 4.2 and above = Summa Cum Laude
- 4.0 - 4.19 = Magna Cum Laude
- 3.8 - 3.99 = Cum Laude

**NOTE:** GPA will be calculated to include all classes taken in grades 9-12 (including MoVIP classes), but exclude correspondence, night school and high school courses taken in grade eight or below. GPAs will not be rounded up.

Students are required to take a minimum of eight semesters in each of the core areas: math, communication arts, science, and social studies.

Students are required to earn a minimum of “proficient” on all but one MAP/End-of-course exams taken over high school level coursework.
On college entry exams, students are required to attain a minimum of a 27 composite score on the ACT or a combined 1220 on two of the three sections of the SAT.

Cum Laude honors will be announced as students’ names are read at commencement. Students will wear a Cum Laude medallion with the color ribbon selected by the individual high school:

- Summa Cum Laude = gold medallion
- Magna Cum Laude = silver medallion
- Cum Laude = bronze medallion

A seal will be placed on the students’ diplomas indicating the appropriate honor.

**Class rank will be reported on transcripts only.**

---

**ARETÉ**

The Francis Howell Central Student Recognition Committee, ARETÉ, recognizes students through four ‘Pillars of Excellence’ and uses the following criteria as a measure in awarding academic letters:

**I. Academic Excellence - Exemplary Grades**
This pillar represents a school member’s dedication to academics through exemplary performance. Students achieve this pillar by maintaining 3 consecutive semesters of a G.P.A. of 3.4 or higher.

**II. Athletic Sportsmanship - Collaboration and Model Participation in Athletics**
This pillar represents a student’s ability to show meaningful athletic sportsmanship. Students achieve this pillar by demonstrating for at least 2 consecutive seasons of a sport, or 2 sports within the same academic year, the ability to collaborate among team members, serve as a model example in their approach to the sport, and demonstrate appropriate behavior in competition.

**III. Extracurricular Service - Dedication and Leadership to Extracurricular Activities**
This pillar is offered to students who demonstrate model behavior and service to areas beyond their academics and/or athletics. Students achieve this pillar by demonstrating a meaningful contribution to an extracurricular program or school-wide committee for at least one academic school year.

**IV. Productive Citizenship - Civic Responsibility and Community Involvement**
This pillar represents a student’s exemplary dedication to their community. Students achieve the pillar by demonstrating specific actions that are meaningful. Students may receive this pillar for actions or events in the community and/or within the school during a 6 month period.

---

**HONOR ROLL**

The honor roll is computed at the end of each semester. A student must have earned a 3.0 GPA for the semester to be included in the honor roll.

---

**ACADEMIC AND SPECIAL AWARDS**

Qualified graduates may earn the following awards: the Francis Howell College Preparatory Studies Certificate, the President’s Award for Educational Excellence, and/or the Standard of Academic Accomplishment Award (SAA).

The criteria for these awards are outlined below. Students are encouraged to plan accordingly and to petition for the awards for which they qualify during the spring of their senior year. Additional information regarding these awards is available in the Guidance Office.

---

**FRANCIS HOWELL COLLEGE PREPARATORY STUDIES CERTIFICATE**

The Missouri State Board of Education awards the College Preparatory Studies Certificate (CPSC) to Missouri students who successfully complete a rigorous academic program in high school. The certificate is awarded in addition to the regular high school diploma granted by local school districts. Created by the Board in 1985, the certificate is designed to provide incentive and recognition for public and non-public high school students who exceed the state’s minimum graduation requirements.

Awarding the College Preparatory Studies Certificate is voluntary on the part of school districts, and meeting the requirements is voluntary on the part of the students. While the certificate is primarily intended as an incentive for college-bound students, those who are not planning to enter college also may wish to work toward earning the award.

**To be eligible for the certificate, a student must meet these requirements:**

1. Complete a rigorous high school program cooperatively planned by the school, the student and the student’s parents. The program must include at least these units of credit:

   **Subjects Units**
   
   - English/Communication Arts .................. 4.0 units
   - Mathematics .................................. 4.0 units
   - Science ...................................... 3.0 units
   - Social Studies ................................ 3.0 units
   - Fine Arts ................................... 1.0 units
   - Practical Arts ............................... 1.0 units
Personal Finance .................................... 0.5 units
Health ...................................................... 0.5 units
Physical Education .................................. 1.0 units
Specified Core Electives ......................... 3.0 units
General Electives .................................... 4.0 units

**Total 25.0 (above change would make this 24)**

2. Earn at least a 3.0 grade point average (GPA), on a 4.0 scale, in the combined subject areas of English/Communication, Mathematics, Science and Social Studies or overall Grade Point Average.

3. Score above the prior year’s national composite average on the American College Test (ACT) or on the Scholastic Aptitude Test (SAT). This criterion is revised annually to reflect the latest national averages from the ACT and SAT. Check the current year’s certificate order form for the required minimum scores.

4. Complete a strong academic program in the subject areas of English/Communication Arts, Mathematics, Science, Social Studies and specified core electives. **No substitutions are authorized.**

5. Students must also maintain an attendance rate of at least 95% in grades 9-12.

For further information, please visit the Missouri Department of Elementary and Secondary Education website at:

http://dese.mo.gov/divimprove/curriculum/collegeprep/

---

**PRESIDENT’S AWARD FOR EDUCATIONAL EXCELLENCE**

A student must meet all specified requirements for the Missouri College Preparatory Certificate. A student must have a minimum GPA of 3.5 on a 4.0 system and score at or above the 85th percentile on an ACT, SAT or other achievement test.

---

**STANDARDS OF ACADEMIC ACCOMPLISHMENT AWARD**

In order to receive the Standard of Academic Accomplishment Award (SAA), a student must complete all the specified courses required for the Missouri College Prep Certificate. If a student has a GPA of less than 3.0 but greater than 2.5 or has scores at the National average on the ACT, SAT, he/she may still be deemed qualified if the principal believes these grades/scores are truly commensurate with the student’s ability level. **A student must participate in at least one extra-curricular activity for each of the four high school years.** A student must have excellent citizenship/attendance record in each of his/her four years in high school.

---

**4.0 AWARD**

Seniors earning a 4.0 cumulative GPA after 7 semesters of high school will receive a special cord to be awarded at Senior Awards night. Seniors will also be able to wear these special cords at graduation. In addition, seniors with a 4.0 cumulative GPA will be invited to attend a 4.0 luncheon with the superintendent and principal.

---

**HONORS PROGRAM**

The Francis Howell School District offers an Honors Program at the high school level.

**Honors courses include:**
- AP Computer Science (online)
- AP Economics
- English I Pre AP
- English II Pre AP
- AP English Language and Composition
- AP English Literature and Composition
- Newspaper Production
- Yearbook Publication
- Geometry
- Algebra II
- Math Analysis*
- Trigonometry*
- AP Calculus AB*
- AP Calculus BC*
- AP Statistics*
- United States History
- Modern World History
- AP Government & Politics
- AP US History
- AP European History
- AP World History
- AP Psychology
- Physical Science
- Biology
- AP Biology
- Chemistry I
- AP Chemistry II
- Physics I
- AP Physics II
- AP Environmental Science (online)
- Genetics
- World Language: Levels III, IV
- AP World Language
- Treble Choir/Chorale*
- Concert Choir*
- Chamber and Show Choir*
- Symphonic Band/Wind Ensemble*
- Jazz Ensemble*
- Music Theory*

---

Exception: Three units of approved mathematics credit may be substituted for Geometry and Algebra 2 as required by the Missouri College Preparatory Studies Certificate.
AP Art History I
AP Art History II
AP Studio Art
Gifted Mastery*
Introduction to Engineering Design
Principles of Engineering
Digital Electronics
Engineering Design and Development

*Criteria for these courses are determined by meeting the prerequisites.

Admission to the Honors Program is based upon the classroom grade in that subject area from the previous year(s) and test scores on district approved achievement tests.

Honors, Advanced Placement and Advanced Credit courses give students a head start on college while they are still in the supportive environment of a high school classroom. When college admissions personnel see these types of classes on a transcript, they realize the student has been exposed to greater depth of curriculum, which in turn requires students to develop time management and study skills. The combination of these abilities transfers directly to the intensity of college coursework. While we strongly encourage students to challenge themselves with a rigorous schedule of classes, please understand that students who choose to be enrolled in an Honors or AP class will not be allowed to drop to a corresponding regular section after the end of the preceding school year.

Teachers are hired and class sections are designed on students’ initial requests and our schedule does not offer the flexibility for students to make these changes.

Students who transfer to an FHSD high school with weighted grades from another district will only have those courses honored that are the same as weighted courses offered in FHSD.

Grade 9 Honors Course Eligibility
The classroom grades in the content area must be no less than 85% minimum at the end of semester one during grade 8.

A formula for calculating Honors placement will be based on a combination of the Explore Assessment National Percentile scores for Reading, Communication Arts, Math, or Science and the student’s seventh and eighth grade quarter percentages for the content area as follows:

**Communication Arts**
\[
\text{Expl. Rdg + Expl. Comm. Arts + Class Average} = 175 \text{ Minimum} / 2
\]

**Math**
\[
\text{Expl. Math + Class Average} = 175 \text{ Minimum}
\]

**Science**
\[
\text{Expl. Math + Expl. Science + Class Average} = 175 \text{ Minimum} / 2
\]

Social Studies

**Expl. Reading + Class Average = 175 Minimum**

Notification of eligibility for Honors will be made in writing by the counselor, and eligibility letters must be signed and returned before a student may be placed in an Honors course.

Grade 10 Honors Course Eligibility
For entry into the 10th Grade Honors Program, students must meet one of the following criteria:

1) Students currently in 9th Grade Honors must earn a minimum of 80% (B) to continue in 10th Grade Honors.

2) Students who were eligible for 9th Grade Honors but elected not to participate must average an 85% in the respective subject for both semesters of 9th grade.

3) Students not currently in Honors and not eligible for 9th Grade Honors must average a minimum of 85% in the respective subject for both semesters of 9th grade.

Grade 11 Honors Course Eligibility
For entry into the 11th Grade Honors Program, students must complete the following steps:

1) Student must indicate their interest in Honors to the respective teacher.

2) Student must request a recommendation from the respective teacher.

3) Student must submit parental approval on the appropriate Honors form by the designated deadline.

Second Semester Qualification for Honors Program
Students not qualifying at the end of the first semester, but who do qualify at the end of the second semester, MAY be added to the program via a parent appeal begun through the Guidance Office.

Honors Forms
Honors forms will be distributed by the students’ current core area teacher. Students new to the high school can access Honors forms from their counselor.

Appeal Process
If a student is not admitted to the Honors Program under normal conditions, the student/parent may appeal. Likewise, if a student has been enrolled in an Honors Program course and wants to drop, the student/parent will need to appeal. In both cases, the student/parent
should contact their guidance counselor to initiate the appeal process.

**ADVANCED CREDIT PROGRAM**
(DUAL CREDIT CLASSES)

Advanced Credit (AC) courses are college credit courses offered in conjunction with area universities, including the University of Missouri at St. Louis (UMSL) and Lindenwood University (LU). Students have the option of paying for college credit at a reduced rate while enrolled in the class at FHCHS. Official transcripts must be requested from the individual university. Advanced Credit courses that may be offered include:

- AP Art History
- AP United States History
- French III, French IV, French V, Spanish III, Spanish IV, Spanish V
- AP Calculus AB
- AP Calculus BC
- AP Statistics
- AP Chemistry

However, please see your counselor for this year’s list of eligible courses, as this may change on a yearly basis.

1) For UMSL, Seniors and Juniors are eligible for enrollment if they have a 3.0 or higher G.P.A

2) Sophomores are eligible for enrollment only in World Language classes. To do so they must have scored at or above the 90th percentile on the composite scores on PLAN, PSAT, ACT or SAT or have an overall GPA of 3.0 and a GPA of 3.5 in Foreign Language classes taken prior to enrollment in courses with UMSL designation.

The above Advanced Credit courses are also awarded honor points.

Students who have successfully completed at least one Advanced Credit course by the end of the first semester of their senior year and plan to attend UMSL full time are eligible to apply for a special scholarship to UMSL Advanced Credit classes may not carry AC credit every year. The instructor will inform students if the course is not carrying AC credit. It is the student’s responsibility to check with the colleges they are planning to attend to determine if and which of the AC credits they will accept.

**ADVANCED PLACEMENT PROGRAM**

Advanced Placement (AP) is a program of college-level courses coupled with national standardized examinations for currently enrolled secondary school students. The Francis Howell School District, the College Board and the Educational Testing Service provide this opportunity for students to earn college credit while still in high school.

Students who enroll in an AP course have the option, in May of each year, to take the standardized AP credit examination. AP college credit can only be attained as a result of a successful score on the standardized examination. High school graduation credit will be awarded upon successful completion of the course regardless of whether or not the standardized examination is taken.

Students must pay a fee for each AP examination, as charged by the College Board and Educational Testing Service.

Please check with your guidance counselor for a list of the current Advanced Placement (AP) courses offered at your high school. The following courses may be offered:

- AP Computer Science (online)
- AP Economics
- AP English Literature and Composition
- AP English Language and Composition
- AP Art History
- AP United States History
- AP European History
- AP World History
- AP Government and Politics
- AP Psychology
- AP Calculus AB
- AP Calculus BC
- AP Statistics
- AP Biology
- AP Chemistry
- AP Physics
- AP Environmental Science (online)
- AP Studio Art
- AP French
- AP Spanish

Students who qualify and wish to enroll in more than two AP courses should consult with their counselor prior to enrollment deadlines. All AP courses are awarded Honor Points. Please remember to carefully read all of the information contained in the Honors Program section on pages vi and vii. More information is available at: www.collegeboard.com/student/testing/ap/about.html

**A+ SCHOOLS PROGRAM**

A student who qualifies according to the following criteria and continues a post-secondary education at a Missouri public community college or career/technical school may be eligible for state reimbursed tuition for up to 105% of the hours required for the degree program, contingent upon the high school being granted A+ Schools status each year and the availability of State funds.

1. Enter into a written agreement with the school by signing and submitting the A+ Agreement Form no later than September 1st of the student’s senior year;
2. Attend a designated A+ School for three consecutive years prior to high school graduation;
3. Graduate from high school with a minimum unweighted grade point average of 2.5 on a 4.0 scale;
4. Maintain a 95% attendance rate for all four years of high school;
5. Perform 50 hours of unpaid peer mentoring or tutoring of other students on FHSD property, under the supervision of a FHSD employee, to be completed by January 1st of the student’s senior year;
6. Maintain a record of good citizenship according to the State A+ Schools Program, FHSD Code of Conduct, and High School Student Handbook;
7. Beginning with the graduating class of 2015, students must score Proficient or Advanced on the Algebra I End of Course (EOC) exam;
8. Maintain a documented, good faith effort to secure all available federal post-secondary student financial assistance funds that do not require repayment. The Free Application for Federal Student Aid (FAFSA) should be completed and submitted after January 1st of the student’s senior year. Individuals may do so at www.fafsa.gov.
9. All individuals required to register under the Military Selective Service Act must provide proof of registration. Individuals required to do so may register at www.sss.gov.

For more information, please contact the A+ Coordinator at 636-851-4632.

ST. CHARLES COMMUNITY COLLEGE

High school students may earn advanced credit at St. Charles Community College through vocational articulation agreements. However, articulated credit applies only to Applied Science degrees, not Associate of Art transfer degrees.

In the Francis Howell School District, the following courses are articulated with (SCC).

- Accounting I
- Business Computer Programming I & II
- Business Entrepreneurship / Junior Achievement
- College 101
- Desktop Publishing
- Marketing I and II
- Introduction to Business
- Personal Finance
- CAD I
- CAD II
- Residential Architecture
- Child Development I
- Child Development II

Students should supply SCC with a transcript from their high school showing grades of “B” or better in the course or courses for which articulation credit is to be granted. Tuition will be waived for articulation courses. Students must accumulate 15 credit hours at SCC with a 2.5 GPA or better to receive the articulation credit.

CAREER EDUCATION WORK STUDY PROGRAMS

The Francis Howell School District offers three vocational work-study programs for Seniors. These programs include:
- Business/Cooperative Work Experience
- Marketing/Cooperative Work Experience
- Culinary Arts Work Experience

These programs allow high school students release time and credit for supervised work experience. Students must be enrolled in a minimum of four credit classes in their high school.

CAREER EDUCATION WORK STUDY PREREQUISITES

Business/Cooperative Work Study
- One Unit of Business
- 12th grade status and work program teacher approval
- Concurrent enrollment in Business Technology

Marketing/Cooperative Work Experience
- 12th grade status and work program teacher approval
- Concurrent enrollment in Marketing I or II

Culinary Arts Work Experience
- 12th grade status and concurrent enrollment in Culinary Arts

LEWIS AND CLARK CAREER CENTER

Students who want to be considered for a technical program need to complete a Lewis and Clark application form and return it to their home school guidance office. Depending on the program, students must be completing 10th or 11th grade to apply.

Student information is compiled regarding grades, attendance, discipline patterns and aptitude testing. Students who have completed the entire application procedure will be rated. Enrollment is based on the cooperative decision of the enrollment team at each sending school. For priority consideration, students need to complete the application procedure according to the timeline established by their high school and Lewis and Clark Career Center.

All classes at Lewis and Clark Career Center meet for three periods each day, and earn three units of credit per year. Articulation agreements are in place in certain programs for qualified students who complete their program. Students who complete the technical program
with a minimum of 90% attendance and a “C” average will receive a certificate of completion.

**Please note:** Due to time allotted for travel to and from Lewis and Clark Career Center, students earn a maximum of 6 credits per year. Students who are credit deficient and choose to attend Lewis and Clark may jeopardize their “on-time” graduation. See your counselor for potential credit assistance options.

### DUAL ENROLLMENT

Dual enrollment provides seniors the opportunity to earn college credit while also attending high school. Students must complete a Dual Enrollment Form and apply to a local college with which FHSD has an articulation agreement. Students must then furnish proof of this enrollment and paid receipt to their counselor for final admission to the program. **Dual enrollment students must have a 3.0 cumulative G.P.A. and attend high school for a minimum of four periods.** If they attend high school for five periods, they must be enrolled in at least one three credit hour college class. If students attend high school for four periods they must enroll in at least six college credit hours.

### GIFTED EDUCATIONAL PROGRAM

The Francis Howell School District offers a program for gifted students. Students in the program must meet the guidelines established by the Francis Howell School District and the Missouri State Department of Elementary and Secondary Education. Students who are interested in entering the program should check with their building level Gifted facilitator to review eligibility requirements.

### TESTING DURING HIGH SCHOOL

#### EOC

End of Course Exam / State Assessment Program

For the 2012-2013 school year, end of course exams will be given to students upon completion of these courses: Biology, Algebra I, English II & American Government II.

#### PLAN

The PLAN test is administered to all Sophomores. Experience taking this test helps students prepare for the ACT.

#### ACT, SAT

These are placement tests used for admission purposes and some scholarship applications for students planning to pursue education beyond high school at a two- or four-year college. Fees are charged.

#### PSAT/NMSQT

Preliminary SAT offered to Sophomores and Juniors. Juniors use PSAT scores to qualify for the National Merit Scholarship. Fees are charged.

### OASIS

Lewis and Clark Career Center administers this aptitude test to students who apply for admission to the technical school.

### COLLEGE ADMISSIONS REQUIREMENTS

In general, students are encouraged to take as much college related coursework as possible during high school to maximize their academic potential, enhance their admission opportunities for college and improve their scores on college entrance tests. These courses include Math, Science, Communication Arts, Social Studies and World Language. Listed below are the course requirements for admission to various area universities. Keep in mind that class rank and ACT or SAT scores also affect admissions to college.

#### MISSOURI STATE COLLEGES

SCHEDULE CHANGE POLICY

Please make your choices of courses for next year very carefully. Once the enrollment process has been completed, it is very difficult to change schedule requests. Parents are requested to review their student’s course requests prior to the completion of enrollment and sign the course request form.

Teaching assignments, textbook allocations, supply and equipment expenditures are made based upon the spring enrollment period. Student requests for changes disrupt this process and will not be honored.

Schedule changes due to the cancellation of courses or sections, failures of required or prerequisite classes or other unplanned occurrences will be handled by the high school Guidance Office. Students impacted by these situations will be contacted about possible alternatives during the summer. There will be no schedule changes after the 1st (10) days of the semester.

DROPPING A CLASS

If a student drops a class after the first ten (10) days of a semester, the student receives an “F” for the semester.

MISSOURI CONNECTIONS CAREER PLANNING

The State of Missouri now sponsors an Internet accessible career and educational planning program called Missouri Connections. The program provides students and parents with the necessary tools for career and educational planning. Students will be trained in how to utilize Missouri Connections during classroom presentations. Parents are encouraged to use the program at home with their student to help explore career options, develop a comprehensive educational plan, and research colleges and scholarships. Students will be given an access code and instructional guide, or parents can contact the Guidance Office.

ACTIVITIES INFORMATION

Questions or Additional Information Contact: Scott Harris, Activities Director

PHILOSOPHY OF ACTIVITIES

The philosophy of activities in the Francis Howell School District is such that it is considered an integral part of the school’s program of education: providing experiences that will help young men and women physically, mentally and emotionally. Students are stimulated to want to win and excel, but the principles of good sportsmanship prevail at all times to promote the educational values of contests. The element of competition and winning, though it exists, is controlled so that it does not determine the nature of the program. This is considered to be educationally and psychologically sound because of the training it offers for living in a competitive society.

We believe that participation in activities, both as a player and as a student spectator, are an integral part of the student’s educational experiences. Such participation is a privilege that carries with it responsibilities to the school, to the team, to the student body, to the community and to the student himself/herself. In his/her play and his/her conduct, he/she is representing all the groups. Hopefully, such experiences contribute to the knowledge, skill and emotional patterns that he/she possesses, thereby making him/her a better person and citizen.

WHO IS ELIGIBLE FOR ACTIVITIES?

In order for a student to participate in activities, he/she must fulfill completely all the regulations and requirements set forth by the M.S.H.S.A.A. and the Francis Howell School District.

M.S.H.S.A.A. ELIGIBILITY STANDARDS

1. Student must be enrolled in courses offering 3.0 units and must earn 3.0 credits the preceding semester. Summer school credits may apply to state eligibility standards provided the course is necessary for graduation or promotion and is placed on the school transcript. No more than 1.0 credit in summer school shall be counted toward 1st semester eligibility.
2. Must not have reached 19th birthday prior to July 1st preceding the opening of the school year.
3. Are ineligible after the class in which they entered 9th grade has graduated.
4. Are ineligible for varsity competition for one calendar year if they transfer to Francis Howell from either a public or parochial high school without a corresponding change of residence of parent or guardian. (There is a possibility of a waiver when transferring from private to public.)
5. Must be a good school citizen. Behavior unbecoming a participant could result in the principal revoking the privilege of a student to participate in an activity temporarily or permanently.
6. Must have satisfactorily passed the physical examination. Exams can be taken after February 1st of the preceding year and before school.
7. Must have a signed parent permission form and activities handbook acknowledgment form to participate in interscholastic activities.
8. All 9th grade students who have been promoted from the 8th grade are automatically eligible during their first semester of high school, but
must meet district/state requirements their second semester.

FRANCIS HOWELL SCHOOL DISTRICT
ELIGIBILITY STANDARDS

Any student who represents one of the Francis Howell High Schools by participating on athletic teams or other groups that perform in public (bands, chorus, dramatics, cheerleaders, pommers, speech, etc.) shall meet the standards of eligibility specified in the constitution of the Missouri State High School Activities Association and those additional standards of the Francis Howell School District.

1. Student must maintain a minimum 1.5 GPA.
2. Student must attend all practices, contests, and other performances unless excused by the coach.
3. Student must not wear school equipment at any time except while participating in practice or school contest.
4. Once student has made a team in a sport, student cannot go out for another sport until the first sport season is over.
5. Student must not have any outstanding athletic fines.
6. Student must attend school the entire day of a game and must attend school on Friday to play on Saturday.
7. Student must have satisfactorily passed a physical examination dated after February 1st and preceding the first day of the season for the sport in which student is to participate. The examination report must specifically state that student “may participate in sports,” and must be signed by the physician who conducted the examination.
8. Any student who falsifies the physical examination form or any other required participation form is subject to suspension and/or permanent removal from the team or group by the Activities Director and/or building Principal, and may be suspended or removed from additional activities depending upon the nature and magnitude of the offense.
9. Student must be a credible school citizen in accordance with the following standards:
   - Students who are serving out-of-school (or in-school) suspension may not practice for, or participate in, school activities during the suspension. Multiple and/or serious violations of the Code of Student Conduct may result from current and future school activities.
   - Student must not use, possess, or distribute tobacco products while on school property or at school activities, whether on or away from district property.
   - Student must not use, possess, or distribute alcohol or controlled substances at any time, whether on or away from school property.
   - Student must not be arrested for, charged with, or convicted of a felony or misdemeanor under either criminal or juvenile law, whether the offense occurs on or away from school property.

When a student is accused of an offense under either criminal or juvenile law, the charges may be dismissed or the student acquitted due to the high standard of proof required under criminal and juvenile proceedings: guilt beyond a reasonable doubt. However, the District reserves the right to make an independent determination regarding whether the student engaged in the misconduct alleged, and is required only to establish by a preponderance of the evidence (more likely than not) that the student engaged in such misconduct.

TRANSFER STUDENTS

All participants new to the Francis Howell District in the past year are required to file a Transfer of Eligibility form.

NCAA-Eligibility Center

If a student is planning to enroll in college as a freshman and wishes to participate in Division I or Division II athletics, he/she must be certified by the NCAA. The Eligibility Center ensures consistent application of NCAA initial eligibility requirements for all prospective student athletes at all member institutions.

Athletes should code 9999 on their ACT Registration Form in order for the NCAA to receive their official test scores.

If you have questions about the NCAA eligibility, please call the NCAA Eligibility Center toll-free at 877-262-1492. The web address is www.eligibilitycenter.org Select Login/New Account
Supply e-mail address to receive instructions for registering.

To view the 48H list of approved core courses, click on “For High School”, view Core Course list, and enter the high school code, 262-851.

It is the responsibility of student athletes to register with the NCAA Eligibility Center.

The NCAA recently released the new SAT/ACT sliding scale that corresponds with the increased GPA requirements for the class of 2016 and beyond. Any student-athlete beginning high school in the fall of 2012 and after who is even remotely considering the
possibility of playing a sport collegiately needs to understand these changes. The wiggle room to correct academic shortcomings has been greatly reduced.

Here is a summary of the new D1 academic requirements for a Full Qualifier that take affect for the class of 2016 and beyond:

- The minimum core course GPA has increased from 2.00 to 2.30
- 10 of the 16 core course requirements must be satisfied prior to the start of the senior year
- 7 of those 10 core courses must be from the English, Math and Science subsections
- Grades earned in the 10 core courses are "locked in" for the purpose of calculating the final core course GPA
- Any retakes of the first 10 core courses must be completed prior to senior year

The NCAA has also introduced a new status for the class of 2016 - the "Academic Redshirt." An "Academic Redshirt" may receive a scholarship and practice with their team, but may not participate in game competition as a college freshman. Students with a GPA of 2.30 or above may achieve either "Academic Redshirt" or "Full Qualifier" status, depending on their SAT/ACT test scores. Students with a core course GPA between 2.00 and 2.29 cannot attain "Full Qualifier" status but may achieve "Academic Redshirt" status by meeting minimum sliding scale test score requirements.

The new sliding SAT/ACT scale results in significant changes in minimum test score requirements. The minimum SAT score required to compete as a college freshman increased by 180 points while the minimum ACT score increased by an average of 14 points (sum score).

Here are two examples of the changes to the new sliding scale:

- Prior to 2016: 2.00 core course GPA + 1010 SAT or 86 ACT = Full Qualifier
- 2016 and after: 2.00 core course GPA + 1020 SAT or 86 ACT = Academic Redshirt
- Prior to 2016: 2.50 core course GPA + 820 SAT or 68 ACT = Full Qualifier
- 2016 and after: 2.50 core course GPA + 1000 SAT or 85 ACT = Full Qualifier

Remember, the NCAA does not include the writing component of the SAT or ACT and the ACT score is a sum score (not average) of the English, math, reading and science sections.

Finally, just because a student-athlete meets the minimum NCAA academic standards, it doesn't mean they will be admitted to play sports at the college of their choice. Many universities have academic standards for incoming freshman athletes that are much higher than the NCAA minimum requirements.

So what does this all mean? Student-athletes must start tracking courses early. A student-athlete should calculate their initial core course GPA at the conclusion of their first semester in high school and continue to do so each semester thereafter.

Now more than ever, every semester counts.

NAIA-Eligibility Center

If a student is planning to enroll in college as a freshman and wishes to participate in National Association of Intercollegiate Athletics, he/she must be certified by the NAIA. The Eligibility Center ensures consistent application of NAIA initial eligibility requirements for prospective student athletes at all member institutions.

Athletes should code 9876 on their ACT Registration Form in order for the NAIA to receive their official test scores.

If you have questions about the NAIA eligibility, please call the NAIA Eligibility Center at 816-595-8180.

The web address is www.playnaia.org

It is the responsibility of student athletes to register with the NAIA Eligibility Center.

*In addition to the .5 PE credit their Freshman year, all students are required to take another .5 credit of PE in their Sophomore, Junior, or Senior year.

**All students are required to complete .5 credit of Personal Finance in 11th or 12th grade. This credit counts towards the required 1.0 credit of Practical Art.

**All students are required to complete 1.0 credit of Fine Art and 1.0 credit of Practical Art in grades 9-12
### ACCOUNTING I

**0303001 Semester 1**  
**ACCOUNTING I**  
Prerequisite: None  
Grades 10-12

Accounting is an essential course for anyone planning a college major in business or an immediate career in the business world. This course is especially appropriate for small business (single ownership or partnership) operation. Emphasis is placed on why financial records are kept, how they are kept, and how to use them as guidelines for decision making. **Internet use is an integral part of this course.** Qualifies for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).

### ACCOUNTING II

**0303051 Semester 1**  
**ACCOUNTING II**  
Prerequisite: Successful completion of Accounting I or teacher recommendation  
Grades 11-12

In this second-year accounting course, students will apply the basic principles learned in the first-year course to methods commonly found in business, especially corporations. Students will prepare and analyze financial statements and budgets, and use computers to further explore accounting. This course helps students match the rapid pace of college accounting required for any business degree and to be better qualified for an entry-level accounting job. **Internet use is an integral part of this course.** May qualify for dual credit at Lindenwood University.

### AP COMPUTER SCIENCE A (Online)

**0303751 Semester 1**  
**AP COMPUTER SCIENCE A (Online) – NCAA-approved**  
Prerequisite: Algebra I and Algebra II are required, although Algebra II can be taken concurrently. Some previous programming experience is also important and necessary for students to have before attempting this Computer Science Advance Placement A course. This course is equivalent to a first year university or college level course and the content is covered quickly. An introductory course in C++, Pascal, Visual Basic, Java or similar course would be sufficient. This online course is considered an 8th hour course offering. Students will be responsible for their pacing in the course.

Similar to a college-level introductory computer science course, students will use the Java programming language to learn object-oriented computer programming. Students will use important problem-solving skills to create well-designed software. Coursework includes the development of algorithms as well as re-usable classes and methods. Software development will be explored as well as procedural programming, arrays and data abstraction. This course is presented online and the student will be required to complete coursework to the established timeline provided by the virtual instructor. Successful completion of this course is dependent on the student's ability to meet the criteria outlined by the virtual instructor’s syllabus.

### AP ECONOMICS (AND PERSONAL FINANCE*)

**0303271 Semester 1**  
**AP ECONOMICS (AND PERSONAL FINANCE*) – NCAA-approved**  
Prerequisite: None  
Grades 11-12

The purpose of the AP Economics course is to give students a thorough understanding of the principles of micro and macro economics that apply to the functions of individual decision makers, both consumers and producers, within the economic system. It places primary emphasis on the nature and functions of product markets, and includes the study of factor markets and of the role of governments in promoting greater efficiency and equity in the economy. The study of national income and price-level determination and also developing students' familiarity with economics performance measures, the financial sector, stabilization policies, economic growth, and international
economies will be included. Students are expected (although not required) to take the Advanced Placement Micro Economics and Macro Economics exams.

*The personal finance proficiency test will be administered in accordance with the state graduation requirements. Students must pass the proficiency test with a 70% or higher and maintain a B grade average in AP Economics in order to gain credit for personal finance.

0303703  BUSINESS COMPUTER PROGRAMMING I  .5 Units
         Prerequisite: None
         Grades 9-12

Students will learn the concept of programming and problem solving utilizing an object-oriented/event-driven programming language. Students will be engaged in hands-on projects covering introductory programming concepts. Basic computer concepts, language syntax and programming structures will be discussed. **Internet use is an integral part of this course.** *Qualifies (in conjunction with Business Computer Programming II) for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).*

0303753  BUSINESS COMPUTER PROGRAMMING II  .5 Units
         Prerequisite: Business Computer Programming I
         Grades 9-12

This course is a continuation of Business Computer Programming I and focuses on more advanced programming skills including how to test monitor, debug and maintain computer programs. Students will explore the world of game programming and learn how to write their own code. **Internet use is an integral part of this course.** *Qualifies (in conjunction with Business Computer Programming I) for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).*

0303153  BUSINESS ENTREPRENEURSHIP / JUNIOR ACHIEVEMENT  .5 Units
         Prerequisite: None
         Grades 11-12

The primary goal for this course is to introduce students to our nation's free enterprise system, the operation of small businesses and entrepreneurs and the impact of the economy and marketing trends on business. The students will operate a student company (or corporation) in which they will decide what product to sell, calculate its retail price, how to market the item, and how much profit (or loss) was made. Students will share the profits of the company for the semester. All textbook materials are provided by Junior Achievement. **Qualifies (in conjunction with Introduction to Business) for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).*

0303501 Semester 1  BUSINESS TECHNOLOGY  1 Unit
0303502 Semester 2
         Prerequisite: None
         Grades 11-12

This course is designed to prepare students for college business classes and to develop the qualities, knowledge, and skills necessary for entry-level business employment. Areas of study include: Microsoft Office: Word, Access, Excel, PowerPoint, and Publisher; voice recognition software, iPads, resume writing, interview skills, 21st Century technology, movie making, and much more. Senior students enrolled in this course may obtain a part-time business job as described in Business/Cooperative Work Experience. **Internet use is an integral part of this course.**

</tbody>
</table>
0303923   MULTIMEDIA II   .5 Units
Prerequisite: Multimedia I
Grades 9-12

Multimedia II is the continuation of Multimedia I. Students will focus on developing advanced skills to create interactive multimedia applications using the elements of text, 2-D and 3-D graphics, animation, audio, video production, digital imaging, and computer film editing software. The course provides hands-on experiences for creating advanced computer multimedia productions. Internet use is an integral part of this course.

0303803   PERSONAL FINANCE   .5 Units
Grades 11-12

Students will learn how to maximize their earnings, create a budget, plan for major expenditures, save for the future, invest wisely, and keep financial records. Students will learn about banking, taxes, credit, insurance, the stock market, and retirement accounts. Personal Finance prepares students to handle personal financial matters as a teenager and adult, including how to make money work for them. Students will be involved in a variety of simulations and classroom activities that can put them on the road to becoming an educated consumer. This course fulfills the state requirement for .5 credits of Personal Finance. In conjunction with Introduction to Business, qualifies for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).

0303853   PERSONAL FINANCE ONLINE   .5 Units
Grades 11-12

Beginning with the 14-15 school year, students have the opportunity to take Personal Finance online, in a blended learning environment, which means some of the coursework will be completed online and some of the coursework will be done in class with the teacher. This course will be offered at the beginning or the end of the day and will have limited enrollment.

Students will learn how to maximize their earnings, create a budget, plan for major expenditures, save for the future, invest wisely, and keep financial records. Students will learn about banking, taxes, credit, insurance, the stock market, and retirement accounts. Personal Finance prepares students to handle personal financial matters as a teenager and adult, including how to make money work for them. Students will be involved in a variety of simulations and classroom activities that can put them on the road to becoming an educated consumer. This course fulfills the state requirement for .5 credits of Personal Finance. In conjunction with Introduction to Business, qualifies for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).

0303103   WEB PAGE DESIGN I   .5 Units
Prerequisite: None
Grade 9-12

This course will cover the fundamental concepts of Web page design and creation, Web graphics and how the Internet and World Wide Web works. Students will design and develop Web pages using Web page editing/publishing software and optimize images for Web pages. Students will combine text images, sound, and interactivity to web pages. Students will be introduced to multimedia software. It is strongly recommended that students have taken Introduction to Computer Applications prior to taking this course. Internet use is an integral part of this course.

0303123   WEB PAGE DESIGN II   .5 Units
Prerequisite: Web Page Design I
Grade 9-12

This course is a continuation of Web Page Design and focuses on web site planning, usability, design, page layout and graphic preparation skills necessary to produce full-functioning web pages. Includes advanced examinations of
Cascading Style Sheets (CSS), WYSIWYG editors and other web technologies. Students create several web examples, incorporating more complex features and skills. Internet use is an integral part of this course. Internet use is an integral part of this course.

0303203YOU AND THE LAW .5 Units
Prerequisite: None
Grades 11-12

This course is a combination of consumer and personal law, with a strong foundation of business law, making it especially relevant and useful in students’ daily lives. The following law topics will be included: civil, criminal, contract, employment, family, and housing (concerning apartment rental). In addition, occupations in the legal field will be discussed. Internet use is an integral part of this course.

**0505301 Semester 1**  
**ENGLISH III – NCAA-approved**  
**1 Unit**

This junior-level course will ensure students are college and career ready by exploring how American literature and writing has evolved over time. Students will explore text features, author purpose and style, societal background and influence, historical events and their impact on morale, the evolution of writing techniques and how they affect a text. The foundation of these units serves as a foundation in American Literature to prepare students for European literature.

**0505302 Semester 2**  
Prerequisite: English II

**0505551 Semester 1**  
**AP ENGLISH LANGUAGE AND COMPOSITION – NCAA-approved**  
**1 Unit**

This course is limited to juniors who have the opportunity to gain college credit through Advanced Placement. Intensive work in composition and stylistic techniques of writers is strongly emphasized. AP English Language and Composition will engage students in becoming skilled readers of prose written with a variety of purposes. Through their reading and writing, students will understand and be able to analyze the interactions among a writer's purposes, their audiences' expectations and their subjects as well as the way generic conventions and the resources of language contribute to effectiveness in writing. Formal research will be an integral part of this course. This course is designed as a capstone for taking the Advanced Placement English Language and Composition Test. Summer homework is a required element of this course. Advanced credit, when available.

**0505552 Semester 2**  
Prerequisite: Pre AP English II; English II

**0505451 Semester 1**  
**SENIOR LITERATURE AND COMPOSITION – NCAA-approved**  
**1 Unit**

Senior Literature and Composition prepares students for post-secondary literacy tasks by incorporating reading (both literature and informational texts at the college and career readiness level) with analytical student writing. Throughout the course of the year, students will develop and demonstrate their writing ability through narrative, expository, and argumentative styles. The class also incorporates various methods of integrated literacy (listening skills, media, and speaking). Students will evaluate complex texts from a range of genres, cultures and time periods. This evaluation incorporates an understanding of writing as a craft; including consideration of the author's style and purpose in writing. Through wide and deep reading, students will actively determine central themes and ideas and analyze those themes throughout the text. Through discussion and writing students may relate a work to its historical and social context while also reflecting on its relevance today.

**0505452 Semester 2**  
Prerequisite: English III

**0505501 Semester 1**  
**AP ENGLISH LITERATURE AND COMPOSITION – NCAA-approved**  
**1 Unit**

This course is limited to seniors who have the opportunity to gain college credit through Advanced Placement. Intensive work in composition and literary analysis is strongly emphasized. Formal research is required. AP English Literature and Composition will engage students in carefully reading and writing critical analysis of imaginative literature from both British and American writers from the sixteenth century to contemporary times. Through the close reading of these selected texts, students will deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work's structure, style, and themes as well as such smaller-scale elements as the use of figurative language, imagery, symbolism, and tone. This course is designed as a capstone for taking the Advanced Placement English Literature and Composition Test. Summer homework is a required element of this course. Advanced credit when available.
0506153  THE NOVEL – NCAA-approved  .5 Units
Prerequisite: English III or concurrent enrollment in English III

This course is designed for the student who enjoys reading, discussing, and analyzing literature. Students will read a variety of novels of teacher and student choice. The novels read will be from a variety of genres. Vocabulary development, reading skills, and the reading process will be integral components of this course. Improvement of writing skills will be emphasized.

0505903  CREATIVE WRITING – NCAA-approved  .5 Units
Prerequisite: English III or concurrent enrollment in English III

In this course, students experiment with the writing process and the modes of writing, both fiction and nonfiction. Students will be expected to work cooperatively with their peers and their instructor toward strengthening their writing and their reading skills. Students will read and analyze published works as a model for their own writing. Through frequent writing and formal/informal assessment, students’ style will be further developed.

0508503  MYTHOLOGY – NCAA-approved  .5 Units
Prerequisite: English III or concurrent enrollment in English III

This course will build upon the skills taught in English I and English II and reinforce the skills presented in and required for English III and English IV to prepare students for the challenging reading and writing they will encounter in college and beyond. Students will focus on practicing all communication skills including reading, writing, speaking, listening, viewing, finding, and interpreting information with mythological-related readings. Students will study and analyze mythological tales from around the world and then apply this information to classic literary works in order to explain and analyze the allusions used.

0508703  SPORTS LITERATURE AND COMPOSITION – NCAA-approved  .5 Units
Prerequisite: English III or concurrent enrollment in English III

With the premise of the connection between sports and society, this course will prepare students for the challenging reading and writing they will encounter in college and beyond. Students will practice all communication skills including reading, writing, speaking, listening, viewing, finding, and interpreting information. They will also be expected to combine their knowledge and experience by reflecting, exploring, and generating new ideas.

0506353  SPEECH I – NCAA-approved  .5 Units
Prerequisite: None

In this course students learn the elements of effective communication by reading, examining, and writing various types of speeches. Interpersonal communication will be studied, and formal speech presentations will be required.

0506403  SPEECH II – NCAA-approved  .5 Units
Prerequisite: Speech I

This course is an advanced study of the art of communication and concentrates particularly on mass communication and persuasion which will build upon the elements of communication learned in Speech I. Published works will be studied, analyzed, and evaluated for their effectiveness. Formal presentations are required.
0505953  
**DEBATE** – NCAA-approved  
Prerequisite: English I  
.5 Units

In this course, students discuss contemporary problems and debate current universal issues. Research techniques, organizational skills, and the fundamentals of oral presentation will be key components. Students will do written casework, in-class evaluations, and formal oral presentations of both policy and value debates.

0506453  
**JOURNALISM** – NCAA-approved  
Prerequisite: None  
.5 Units

The student will explore all aspects of newspaper, magazines and yearbooks and/or broadcast and emergent media while they write, interview, edit, and design publications and apply media law and ethics. Due to the fact that this course is the foundation course for the publication courses, this course is recommended before taking Newspaper Production or Yearbook Publication.

0506101 Semester 1  
0506102 Semester 2  
**NEWSPAPER PRODUCTION**  
Credit: 1 Unit of Practical Arts or Elective Credit  
Prerequisite: Journalism, Digital Photojournalism and/or teacher recommendation  
1 Unit

This class will be responsible for the production of the school newspaper. Students will be trained and work in the following areas: writing, photography, design, business and emerging media. This is a co-curricular course.

0506111 Semester 1  
0506112 Semester 2  
**NEWSPAPER PRODUCTION HONORS**  
Credit: 1 Unit of Practical Art or Elective Credit  
Prerequisite: Teacher Recommendation (Journalism or Digital Photojournalism highly encouraged)  
1 Unit

This class will be responsible for the production of the school newspaper. Students will be trained and work in the following areas: writing, photography, design, business and emerging media. This is a co-curricular course. This course is designed for the student who wishes to take a more rigorous approach to the study of advanced Newspaper Production. In addition to normal production duties, students will complete an additional project each semester for the honors credit. Working with the teacher, the student will design and implement this independent project, which in addition to hours outside of class to research, will require a presentation.

0506201 Semester 1  
0506202 Semester 2  
**YEARBOOK PUBLICATION (Honors available)**  
Credit: 1 Unit of Practical Arts or elective credit  
Prerequisite: Journalism, Digital Photojournalism and/or teacher recommendation.  
1 Unit

This class will be responsible for the production of the school yearbook. Students will be trained and work in the following areas: writing, photography, design, business and emerging media. This is a co-curricular course.

0506211 Semester 1  
0506212 Semester 2  
**YEARBOOK PUBLICATION HONORS**  
Credit: 1 Unit of Practical Art or Elective Credit  
Prerequisite: Teacher Recommendation (Journalism or Digital Photojournalism highly encouraged)  
1 Unit

This class will be responsible for the production of the school yearbook. Students will be trained and work in the following areas: writing, photography, business, design and emerging media. This is a co-curricular course. This course is designed for the student who wishes to take a more rigorous approach to the study of advanced Yearbook Production. In addition to normal production duties, students will complete an additional project each semester for the honors credit. Working with the teacher, the student will design and implement this independent project, which in addition to hours outside of class to research, will require a presentation.
DIGITAL PHOTOJOURNALISM

Credit: ½ Unit of Practical Arts Credit or Elective Credit
Prerequisite: English I or concurrent enrollment with teacher recommendation

Students will explore all aspects of visual journalism using 35mm cameras, digital video cameras and computers. Topics covered will include visual composition, operation of equipment, computer editing programs and media law and ethics. Assignments will be geared toward publication in one of the school publications. Successful completion of this course meets the recommended prerequisite for Newspaper Production or Yearbook Production.

ENGLISH FOR SPEAKERS OF OTHER LANGUAGES
Program offered only at Francis Howell North High School

2622851 Semester 1  ESOL READING I  1 Unit
2622852 Semester 2

Prerequisite: ESOL Teacher Recommendation

This course will help beginning English Language Learners increase the essential reading and writing skills needed to complete high school class curricula. Reading strategies, comprehension skills, vocabulary improvement, information processing, and writing are stressed every day. Instruction is individualized or in small groups.

2622901 Semester 1  ESOL READING II  1 Unit
2622902 Semester 2

Prerequisite: ESOL Teacher Recommendation

This course will help English Language Learners improve the reading and writing skills needed in core content area classes. This course may be taken in conjunction with ESOL supported content area classes that need additional reading skills for content mastery. Instruction is individualized or in small groups.

2622953  ESOL STUDIES  .5 Units
Prerequisite: ESOL Teacher Recommendation (May be repeated)

This course is designed to help English Language Learners improve the study and communication skills necessary to complete required courses and prepare for college or employment. Instruction is individualized or in small groups and supports academic subjects that require homework completion. Instruction will include, but is not limited to, grammar practice, academic vocabulary, test taking strategies, class organizational skills, and classroom success strategies (note taking and summarization).

ESOL Supported Classes in Communication Arts, Math, Social Studies, Health, and Science  1 Unit
Prerequisite: ESOL Teacher Recommendation
Course # same as mainstream class

ESOL support is offered in selected areas of Communication Arts, Math, Social Studies, Science and Ninth Grade Health. The purpose of this model is to assist the English Language Learners within the selected mainstreamed classes master the curriculum required for graduation.

FAMILY AND CONSUMER SCIENCES

0908703  CHILD DEVELOPMENT I  .5 Units
Prerequisite: None

Child Development I will provide students with the valuable knowledge and skills to prepare them for future parenting roles and child-related careers. Throughout the semester students will explore the various aspects of human development beginning with prenatal development and finishing with the third year of life. In addition, students will study the topics of childcare, parenting roles and styles, health and safety concerns and guidance techniques of children from infancy through the third year of life. Students will have the opportunity to participate in a parenting simulation using an infant simulator. This project helps students understand the implications of parenting in a modern society. An alternative project is available. Students interested in the human or health service career pathways are encouraged to enroll in this class. This would include, but not limited to, future teachers, social workers, and medical professionals.
0908753  CHILD DEVELOPMENT II  .5 Units
Prerequisite: Child Development I

Child Development II starts off where Child Development I finishes. Throughout the semester the students will explore the various aspects of human development, beginning with three-year-olds and finishing with six-year-olds. Students will gain valuable knowledge and skills that will prepare them for future parenting roles and child-related careers. Additional topics will include child development theories, parenting roles, health concerns, safety, guidance, and the preschool child’s stages of development. Students will gain the vital skills for stimulating, teaching, interacting with, and caring for children through a preschool environment. Students will be responsible for creating and implementing activities which facilitate learning and development of the pre-school aged child.

NOTE: Student with a “B” average in Child Development I and Child Development II may receive college credit at St. Charles Community College through articulation into the Early Childhood Program.

0908403  HUMAN RELATIONS  .5 Units
Prerequisite: Grades 10-12

The Human Relations course will prepare students for future adult roles as well as provide them with information they can apply to their current stage in life. Topics of discussion and research will include effective communication and decision making skills, how to develop and maintain interpersonal relationships, human sexuality, conflict resolution techniques, strategies to balance the multiple roles and responsibilities in everyday life, how to create and maintain stable families, and effective parenting skills. Students will complete several independent and group projects throughout the semester. The information acquired in this class can enhance present and future personal relationships.

0908103  CLOTHING AND TEXTILES I  .5 Units
Prerequisite: None

Clothing and Textiles I introduces students to the world of fashion through sewing construction. Studies will include clothing decisions, fabric & pattern selection, and sewing constructions techniques. Students will supply materials for required projects.

0908153  CLOTHING AND TEXTILES II  .5 Units
Prerequisite: Clothing and Textiles I with “C” average recommended

Clothing and Textiles II provides students with strategies that build on construction skills learned in Clothing and Textiles I. Students construct several projects using a variety of fabrics, patterns, advanced techniques, and technology. Students will supply materials for several required projects.

0908203  ADVANCED CLOTHING  .5 Units
Prerequisite: Clothing and Textiles II with teacher approval

Students will work with the teacher to develop an individualized plan of appropriate projects using a variety of specialty patterns, fabrics, and advanced technology. Students will explore the areas of entrepreneurship and career options. Students will supply materials for projects. This course may be repeated for further credit.

0908353  FASHION DESIGN  .5 Units
Prerequisite: Grades 10-12

Fashion Design students will learn the dynamics of the fashion industry including a study of designers and historical clothing, design and apparel production, careers, and merchandising trends. Students will complete individual projects related to fashion design, construction, and marketing.
0908003 FOODS AND NUTRITION I .5 Units
Prerequisite: None

Foods and Nutrition I is designed to promote optimal nutrition and wellness through hands-on activities. Students will have the opportunity to prepare nutritious recipes so that they can prepare healthy food for a lifetime. All labs will be centered around the Recommended Dietary Guidelines for Americans. Lab experiences will be fruit and vegetable preparation, milk and dairy products, quick breads, and healthy protein sources. Students will also learn to prepare traditional American desserts of cookies and pies and will learn the food science behind the cooking process. Emphasis will be placed on personal food choices, the relationship between nutrition and wellness, food safety, food selection, food preparation skills and etiquette. Food and nutrition careers will be explored.

0908053 FOODS AND NUTRITION II .5 Units
Prerequisite: Foods and Nutrition I

Foods and Nutrition II builds and expands the knowledge and skills learned in Foods and Nutrition I. Students will develop advanced skills in food preparation and presentation techniques while increasing their knowledge of nutrition. Labs will include grains, beef, pork, poultry, fish, salads, sandwiches, soups, casseroles, yeast breads, cakes, and appetizers. Students will learn the food science behind the cooking process. Students will learn how to prepare food for entertainment at home, investigate eating disorders, how to feed children and others throughout the life cycle, and how to modify diets for special needs. Students will analyze if a career related to foods and nutrition would be a possible future career path.

0908803 INTERNATIONAL CUISINE .5 Units
Prerequisite: Foods and Nutrition I

International Cuisine builds and expands the knowledge and skills learned in Foods and Nutrition I. Students will develop an understanding of foods, traditions, and customs of other cultures and their own culture through projects and preparation of a variety of regional and cultural foods. Students will prepare foods from Latin America, South America, regions of the United States, various countries of Europe and the Mediterranean, Africa, Asia and the Middle East. Learn history and culture the fun way – through the native foods of the world. Increase your culinary skills and try new and exciting foods from around the globe.

0908551 Semester 1 CULINARY ARTS 1 Unit
0908552 Semester 2 Prerequisite: Foods and Nutrition I and II

Culinary Arts is designed for students who wish to explore the areas of hospitality, culinary arts and food service management. This course is an introduction to all areas related to the hospitality & food service industry. Instructional areas include nutrition, safety and sanitation in the professional kitchen, purchasing and cost control, sales and service, job seeking skills, and food preparation and presentation. Food prepared in this course will be from the perspective of a chef using professional techniques in the industry. Students will have ample opportunity to expand and practice food preparation techniques, knife skills and acquire an extensive culinary vocabulary. Students completing this course may receive a certificate from the Missouri Restaurant Association that can be used to jumpstart a career in the culinary arts.

0908601 Semester 1 CULINARY ARTS WORK EXPERIENCE 1-2 Units
0908602 Semester 2 Prerequisite: Grade 12; concurrent enrollment in Culinary Arts

Students receive on-the-job training in hospitality, food production or a food service related area of their choice. Jobs in these areas provide educational opportunities beyond the school environment by working on an approved job site during the afternoon or evening. One unit of credit is earned for working 10-19 hours each week. Two units of credit are earned for 20 or more hours worked each week. The amount of credit may be different each semester. This instructional program is planned, supervised, and evaluated by both the teacher-coordinator and employer. Students who use this opportunity to complete the work experience component of the Culinary Arts
program will also receive a certificate qualifying them for college credit at various post-secondary culinary programs across the state of Missouri.

0908503  HOUSING AND INTERIOR DESIGN  .5 Units
Prerequisite: None

This project-oriented course is designed to teach the basics of interior design, aesthetics of architectural and furniture styles, analysis of housing selection and floor plans, home furnishings and furniture arrangement, and the application of the elements and principles of design. The information learned in this class can be used for personal enhancement of present and future living environments. Housing and Interior Design students will learn to make responsible decisions to select, create, and maintain desirable living environments. Students will also be introduced to career pathways in interior design and related fields such as drafting and architectural design.

0908903  FACS SENIOR LEADERSHIP  .5 Units
Prerequisite: Grade 12

Senior students acquire skills necessary for independent living after high school and a successful balance of career and family life. Topics will include: career planning and financial responsibility; interpersonal relationships; nutrition and wellness; meal preparation; clothing management and the student's future family and community involvement. Activities will focus on solving practical problems through various food labs, financial simulations, and use of available technology. Students will supply materials for required projects.

FINE ARTS

ART

0202001 Semester 1  INTRODUCTION TO ART  1 Unit
0202002 Semester 2

This course satisfies the Fine Arts requirement for graduation.

Introduction to Art is a beginning course for all students to experience the visual arts and develop their artistic skills. Students will create original artworks in realistic, abstract, and non-objective styles emphasizing the elements of art and principles of design. Inspired by observation and imagination, they will learn about drawing, painting, sculpture, printmaking, ceramics and mixed media techniques to create two- and three-dimensional artworks. Students will analyze and critique artworks, discuss aesthetic issues, and understand how art is related to history and culture. Evaluation will be based on active class participation, written work, tests, and studio work.

0202053  CERAMICS I  .5 Units
Prerequisite: A passing grade in Introduction to Art

Ceramics I is an introductory three-dimensional studio course based entirely in the medium of clay. Students will develop and use ceramic hand-building methods, decorative surface techniques, and glazing and firing skills. Students will create original functional pieces and original fine art pieces. Students will analyze and critique artworks, discuss aesthetic issues, and understand how ceramic objects have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work.
0202103  **CERAMICS II**  .5 Units
Prerequisite: A passing grade in Introduction to Art and Ceramics I
Note: A grade of C or better in Ceramics I is recommended.

Ceramics II is an upper level studio course that will build upon and extend skills developed in Ceramics I. Students will create original functional pieces and original non-functional pieces that will challenge their creativity. Students may develop hand-built, wheel-thrown and decorative surface techniques. Students will analyze and critique artworks, discuss aesthetic issues, and understand how ceramic objects have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work.

0202253  **DRAWING I**  .5 Units
Prerequisite: A passing grade in Introduction to Art

Drawing I is an introductory studio course that develops technical skills in the use of different drawing media. Students will create original two-dimensional artworks based on drawing from observation, perspective, and personal communication of an idea. Students will analyze and critique artworks, discuss aesthetic issues, and understand how artworks have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202303  **DRAWING II**  .5 Units
Prerequisite: A passing grade in Introduction to Art and Drawing I
Note: A grade of C or better in Drawing I is recommended.

Drawing II is an upper level studio course that will build upon and extend skills developed in Drawing I. Students will experience a variety of media and subject matter in creating two-dimensional artworks. Students will be expected to apply drawing skills to achieve desired effects in chosen thematic and observational works. Students will analyze and critique artworks, discuss aesthetic issues, and understand how artworks have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202153  **GRAPHIC DESIGN I**  .5 Units
Prerequisite: A passing grade in Introduction to Art

Graphic Design I is a course that explores visual communication through the use of digital media. Students will use the principles of design to develop technical and artistic skills using computer software such as Adobe Photoshop. Students will analyze and critique artworks, discuss aesthetic issues, and understand the origins of graphic design in the history of art. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202203  **GRAPHIC DESIGN II**  .5 Units
Prerequisite: A passing grade in Introduction to Art and Graphic Design I
Note: A grade of C or better in Graphic Design I is recommended.

Graphic Design II is an upper level studio course in which students will develop advance technical skill in the use of digital media, with software that may include Adobe Photoshop, Adobe Illustrator, InDesign or Flash. They will create original designs targeted for a mass audience and explore the communication of ideas. Students will analyze and critique design products, discuss aesthetic issues, and relate graphic works to current trends and past influences. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.
0202353 PAINTING I .5 Units
Prerequisite: A passing grade in Introduction to Art

Painting I is an introductory studio course that develops technical skills in the use of different painting media. Students will learn to express themselves through color theory and use a variety of painting techniques to create two-dimensional works. Work will focus on observational skills and be inspired by different historical periods. Students will analyze and critique artworks, discuss aesthetic issues, and understand how artworks have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202403 PAINTING II .5 Units
Prerequisite: A passing grade in Introduction to Art and Painting I
Note: A grade of C or better in Painting I is recommended.

Painting II is an upper level studio course that builds upon experiences from Painting I that will enable students to paint compositions with a variety of media. Students will begin to develop their own personal painting style. Students will analyze and critique artworks, discuss aesthetic issues, and understand how artworks have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202453 PRINTMAKING I .5 Units
Prerequisite: A passing grade in Introduction to Art

Printmaking I is an introductory studio course that develops technical skills in the use of different printmaking media and procedures. Students will explore relief, intaglio, and serigraphy methods to produce prints on a variety of surfaces. Students will be expected to construct original and creative compositions utilizing drawing skills and design principles. Students will analyze and critique artworks, discuss aesthetic issues, and understand how artworks have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202503 PRINTMAKING II .5 Units
Prerequisite: A passing grade in Introduction to Art and Printmaking I
Note: A grade of C or better in Printmaking I is recommended.

Printmaking II is an upper level studio course that builds upon skills from Printmaking I. Students will use different printmaking processes such as relief, intaglio, or serigraphy to create art works with various subjects. Students will be expected to construct original and creative compositions utilizing drawing skills and design principles. Students will analyze and critique artworks, discuss aesthetic issues, relate prints to current trends in the field of printmaking, and understand how prints have been used in history across many cultures. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

0202553 SCULPTURE I .5 Units
Prerequisite: A passing grade in Introduction to Art

Sculpture I is an introductory studio course that develops technical skills in the use of different sculpture media such as plaster, clay, paper, wire, or found objects. Students will create original, three-dimensional artworks using modeling, carving, and assemblage. Students will explore historical influences on the evolution of sculpture. Students will analyze and critique artwork construction and discuss aesthetic issues. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.
SCULPTURE II
Prerequisite: A passing grade in Introduction to Art and Sculpture I
Note: A grade of C or better in Sculpture I is recommended.

Sculpture II is an upper level studio course that builds upon skills from Sculpture I while allowing students to experience new sculptural techniques and media. Students will create three-dimensional art forms that express personal styles and/or themes. Students will explore historical influences on the evolution of sculpture. Students will analyze and critique artwork construction and discuss aesthetic issues. Evaluation will be based on active class participation, written work, tests, and studio work with an emphasis on student artwork.

AP ART HISTORY
Prerequisite: Grades 11-12 strongly recommended / Advanced Credit Program Possible.
Note: GPA 2.0+ recommended. Does not require Introduction to Art

Advanced Placement Art History is designed to give students the opportunity to discover, appreciate, and acquire knowledge of art history through the ages, from ancient to contemporary times. This course enables highly motivated students to study college level art history by examining major forms of artistic expression from diverse cultures and understanding each of their contributions to the arts as a whole. Students are provided opportunities to critically analyze works of art in a variety of environments including actual and virtual. A variety of art media and styles will be studied as students look at architecture, manuscripts, painting, drawing, printmaking and sculpture, as a reflection of a given civilization and time period. Students will investigate how various art pieces connect to historical events, how artistic movements influence each other, what is aesthetically pleasing to the eye, and their contexts within social, political and religious themes. This class will give students the opportunity to use their prior knowledge of history, geography, politics, religion, languages, literature, and the visual arts. Students are encouraged, but not required, to take the AP Art History exam in May. This course satisfies the fine arts requirement for graduation. Evaluation will be based on written work, research, class participation and tests.

AP STUDIO ART
Prerequisite:
• Grades 11 – 12
• Passing grade of C or better in Introduction to Art
• Passing grade of C or better in Drawing I & II
• Enrollment by Invitation of the Art Department, approved by Department Chair;
• Additional Studio Courses strongly recommended
Note: Student must fill out application and fulfill requirements to be invited by Art Department

The AP Studio Art course is designed for the serious art student who is interested in intensive art production for the purpose of compiling an art portfolio in preparation for future art studies or college entrance. The portfolio may be used to present during portfolio reviews for admission and scholarship opportunities or to obtain AP credit.

The AP program in Studio Art enables highly motivated students to perform at the college level while still in high school. Students will be challenged to refine their artistic skills and develop mastery of composition. Emphasis will be placed on the production of a volume of quality pieces of artwork. AP Studio Art students will submit completed portfolios at the end of the year with the opportunity to apply for AP credit.

The AP Studio Art Portfolio exam is a performance-based exam rather than a written exam and will require students to demonstrate quality, breadth, and an in-depth engagement in the process of making art. The AP Studio Art student will record portfolio work through a digital slide portfolio that will be submitted for AP review. Students will also be required to write short reflective statements to explain the thought process behind the artwork.

AP Studio Art requires a significant commitment of time and effort, both during class time and outside of the school day. Students interested in this course should be highly motivated and be willing to devote considerable time and
effort to the study of art and the development of higher-level skills. Students will be placed in AP Studio Art I or II based on previous studio course experience and performance, personal goals, teacher recommendations, and portfolio review.

Chorus is an elective introductory performing class which is available to all students regardless of prior experience. Fundamental vocal techniques, music reading, unison, and part singing are emphasized by group rehearsal and written assignments. A variety of music styles are rehearsed. Students will be evaluated on singing ability, active class participation, written work, tests, and performances. Vocal grouping will be determined each year by the director according to class enrollment.

Treble Choir is a choral ensemble for female voices. Students are auditioned for membership or may be placed by recommendation of a former director. Members are expected to demonstrate both group and individual progress in tone production, music reading, and vocal independence. The class will have several performances which may involve school concerts, competitions, and/or festivals. Music selections represent a wide variety of styles and periods, mostly voiced in three parts. Music will include pieces which are a cappella and/or in a foreign language and selections comparable to state required listings. Students will be evaluated on singing ability, active class participation, written work, tests, and performances. Students will need to complete additional requirements for honors credit.

Concert Choir is the primary choral group, participating in four to six major performances each year. Students are auditioned and teacher's approval is required. Class enrollment must maintain proper vocal balance. Concert Choir performs music in standard parts which represent a variety of periods and styles. Selections will include some which are a cappella and in a foreign language and music comparable to state required listings. Students will further develop their abilities in tone production, independence of voice parts, and appropriate interpretation. As a part of public performances, Concert Choir participates in a festival and/or enters state choral contest. Student grades will be based on singing ability, active class participation, written work, tests, and performances. Vocal grouping will be determined each year by the director according to class enrollment. Students will need to complete additional requirements for honors credit.

This select ensemble is chosen from students who are accepted based on audition. The students should be enrolled in another choral ensemble either their junior or senior year in addition to Chamber Choir. Balanced voice parts must be maintained. Chamber Choir performs music in standard parts which represent a variety of periods and styles. Selections will include some which are a cappella and in a foreign language and music comparable to state required listings. This group performs challenging chamber ensemble repertoire for six to eight performance and contest related activities during the year. Additionally, the students are required to meet outside the normal class time to rehearse at the director's discretion. Grades will be based on singing ability, active class participation,
written work, tests, and performances. Vocal grouping will be determined each year by the director according to class enrollment. Students will need to complete additional requirements for honors credit.

1211201 Semester 1  INTRODUCTION TO MUSIC APPRECIATION  1 Unit
1211202 Semester 2  
Prerequisite: None

This class surveys historical and current musical styles by studying the role of music in society, the influential composers who have shaped music throughout the world, the development of musical forms and how music is integrated into our daily lives. Students will also apply their knowledge of music notation, score reading and performance by learning the fundamentals of playing an instrument. Evaluation will be based on written assignments and tests, class participation, playing tests and assessment of listening skills which will be enhanced through guided group listening. This course satisfies the Fine Arts requirement for graduation.

1211251 Semester 1  MUSIC THEORY HONORS  1 Unit
1211252 Semester 2  
Prerequisite: Grade 10-12; strong music background and teacher recommendation

Music Theory is designed for the serious students who plan to continue with music either by studying at the college level or by advancing their personal degree of understanding for use after high school. A list of entry-level expectations will be provided at the time of enrollment, and students are responsible for these standards when entering the class. The class develops the ability to hear in the mind what is on the printed page and to write music to be performed. Theory covers rhythmic and pitch notation, relation of staff notation to the keyboard, construction and analysis of chords and chord progressions, four-part writing, recognition of musical forms, sight singing, dictation, and aural training. Students will be evaluated on homework, tests, aural and reading skills, and class participation.

1211301 Semester 1  CONCERT BAND  1 Unit
1211302 Semester 2  

The Concert Band will present two public concerts a year and usually competes in the state instrumental music contest. The Concert Band will rehearse a variety of music styles and play selections comparable to state high school lists of required pieces. Concert Band will be divided into two groups creating the Basketball Pep Bands, and each band will perform at half of the games.

1211351 Semester 1  SYMPHONIC BAND/WIND ENSEMBLE  1 Unit
1211352 Semester 2  (Honors available Course # 121136)  
Prerequisite: Selection by audition; for honors: grade 10-12; conference with department chair

Students selected for the Symphonic Band/Wind Ensemble will need to demonstrate a high degree of proficiency on a selected instrument, be able to perform concert scales from memory, demonstrate competent mastery of range, tone, and sight reading, and perform a prepared solo. The Symphonic Band/Wind Ensemble members will rehearse a variety of musical styles and play music comparable to selections on the state high school lists of required pieces. Symphonic Band will be divided into two groups creating the Basketball Pep Bands, and each band will perform at half of the games. Students will need to complete additional requirements for honors credit.

1211401 Semester 1  JAZZ ENSEMBLE (Honors available Course # 121141)  1 Unit
1211402 Semester 2  
Prerequisite: Selection by audition; for honors: grade 10-12; conference with department chair

This auditioned ensemble performs standard and contemporary jazz literature and exposes students to improvisation. Students enrolled are expected to participate in concert band with the exception of instruments such as guitar and keyboard. Class size will be limited to balance the instrumentation required for jazz
arrangements. Jazz Ensemble will present at least two public performances a year. It may also enter competitions, play for school and/or district activities, and perform at community functions. Students will need to complete additional requirements for honors credit.

**1211451 Semester 1**
**PERCUSSION CLASS**
1 Unit
Prerequisite: Proficiency on instrument and teacher recommendation

This class is available for all types of percussionists: mallet, cymbals, tri-toms, tympani, snare and bass drum. The group will rehearse music arranged specifically for percussion, perform for the public with concert groups and may enter solo and ensemble competition. Students should be able to demonstrate proficiency on percussion instruments to earn teacher approval to enroll. The percussionists will be divided into two groups creating the Basketball Pep Band and each band will perform at half of the games.

**THEATRE**

**0505613**
**ACTOR’S STUDIO I**
.5 Units
Prerequisite: None

This is a great class for students wanting to get involved in or learn more about drama and acting. Students will be introduced to acting through physical and vocal exercises. Students will explore character development through improvisation, monologues and duet scenes. The course emphasis is on activities that require the students to actively apply good acting techniques. This course is designed to develop actors’ self-awareness and self-confidence as they develop their performances. All improvisations, monologues and scenes are presented in class.

**0505663**
**ACTOR’S STUDIO II**
.5 Units
Prerequisite: Actor’s Studio I

Students will further develop their knowledge of basic dramatic scene structure and characterization by exploring improvisations, monologues, duet scenes and ensemble performances. Some of the major units include advanced scene study, advanced character study and script analysis, student written scenes, and directing. Students will focus on specific acting techniques and individual growth through self-reflection and goal setting. All improvisations, monologues and scenes are presented in class.

**0505813**
**TECHNICAL THEATRE I**
.5 Units
Prerequisite: None

This is an excellent course for students to earn their fine art credit in a hands-on and fun environment. Students will study the skills associated with set construction, scene shop maintenance, and painting—through hands on activities in class. The basics of technical rigging, stage lighting and sound are also introduced. Students will be required to participate in safety training for all areas of technical theatre. Students will also learn the basics of make-up application and costume development. This is a hands-on course and students will participate in practical applications of the methods used in all of these technical areas.

**0505713**
**TECHNICAL THEATRE II**
.5 Units
Prerequisite: Technical Theatre I

Students will study the skills associated with design in technical theatre. Students will learn set design, lighting design, audio design, costume / make-up design and implement their designs through building of mini-models and hands on application techniques. Students will study several plays as context for their designs and will create designs in all of these technical areas for at least one play. Students will also produce a technical theatre portfolio as part of this course. This is an excellent course for students who want more hands-on learning activities or advanced designing experience.
INTENSIFIED THEATRE

Prerequisite: Actor’s Studio I and II or Technical Theatre I and II; teacher approval

This course is designed to be an advanced independent study of theatrical concepts. Each student will declare an individual focus area and learning goals within that focus area. Based on their goals, and with guidance from the teacher, students will design their course of study for their focus area. Focus areas include: Playwriting, Stage Management, Directing, Theatre History, Advanced Acting, and Production Design. Students will research advanced concepts within their focus area. Students will present a portfolio for assessment.

GIFTED AND TALENTED

2095101 Semester 1  GIFTED-SELF DIRECTED LEARNING-MASTERY HONORS  1 Unit
2095102 Semester 2  Prerequisite: Meet state guidelines for and admission into the Gifted Program and approval of the gifted facilitator

Mastery Honors provides the opportunity for students to explore or expand their skills and learning interests such as independent AP study or online college dual enrollment. Students are expected to select, pursue, and complete an in depth study of professional quality. Students will develop an comprehensive proposal for this study and acquire a mentor to guide them through the area of study. In addition to preparing the study, students are expected to participate in group and individual activities focused on communication, critical thinking, personal growth, and creativity. Students may repeat this course. Students may take Gifted-Self Directed Learning concurrently with this Mastery Honors. This course is designed to meet the unique and diverse intellectual, emotional, and social needs of gifted students.

2095001 Semester 1  GIFTED-SELF DIRECTED LEARNING  .5 per sem.
2095002 Semester 2  Prerequisite: Meet state guidelines for admission into the Gifted program

Self-Directed Learning provides the opportunity for students to explore or expand their skills and learning interests. This course may be taken for more than one semester since the project and skills are updated each semester with the student choices of topics. Students are expected to select, pursue, and complete an in depth study of professional quality in an area of interest. In addition to preparing the study, students are expected to participate in group and individual activities focused on research skills, communication, critical thinking, personal growth, and creativity. Mastery Honors may be taken concurrently with this course. This course is designed to meet the unique and diverse intellectual, emotional, and social needs of gifted students.

INDUSTRIAL TECHNOLOGY

1009101 Semester 1  RESIDENTIAL ARCHITECTURE  1 Unit
1009102 Semester 2  Prerequisite: None

Residential Architecture provides the student with a unique opportunity to learn how to properly develop house plans which can be used for college portfolio use. Hand sketching, manual drafting and automated drafting will be taught. Some of the areas covered include: building and site selection, interior and exterior styling, individual room planning, and fundamental construction methods. Emphasis is also placed on career exploration and new technological developments in architecture. This course is especially beneficial to students interested in becoming an architect, design engineer, builder, decorator, draftsman, construction worker, or homeowner. Qualifies for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).

</tr>
</tbody>
</table>

CAD I is a beginning course which provides students with an opportunity to develop skills in making and using technical drawings. Students begin with the basics of equipment and material usage and proceed through fundamental drawing techniques and procedures. Drawing emphasis will focus on CAD (computer aided drafting) with many of the student drawings being produced using CAD equipment. The student should have a good background in basic mathematics. This course is especially beneficial to students interested in enrolling in the Project Lead the Way Engineering courses, or careers in designing, engineering, drafting, commercial art, graphic arts, production, and construction careers. Qualifies for articulated Associate of Applied Science (A.A.S.) credit at St. Charles Community College (not A.A. transfer credit).

CAD II combines a continuation of the fundamental concepts developed in CAD I with additional concentrated areas of engineering drawing, reverse engineering, and 3D design projects. CAD Auto Desk Inventor will be used throughout the course for the development of student drawings. Provisions are made for individual specialization in selected areas as time permits. This course is especially beneficial to those students interested in engineering, designing, drafting, and computer drawing.

Woodworking I will provide students safe exposure to household equipment such as hand tools, power tools and machines, such as table saws, routers, planers and radial arm saws. Students will also study related information which will include: project planning, properties of wood, wood joints, fasteners, wood finishes, and career opportunities. This course is especially beneficial to students interested in building trades, wood products industries, and furniture construction careers or becoming a do-it-yourself homeowner. Woodworking I is an introductory course, no prior knowledge of woodworking is necessary. This course fulfills one credit in the practical arts category.

Woodworking II is designed to provide the student with an opportunity for studying wood technology, furniture design, and furniture construction as they build an individualized project. Emphasis will be on the development of skills in machine operations, wood fastening, assembly, and finishing procedures. This course is especially beneficial to students interested in furniture and cabinet making, design, engineering, construction, and production careers.

This course develops an understanding of algebraic concepts. Students will learn to think logically and symbolically. Using experimentation and reasoning, students will develop the knowledge necessary to create and manipulate symbolic rules. Topics covered will include, but are not limited to: patterns, ratios and proportions and linear equations and inequalities. This course is equivalent to the first semester of Algebra I.

This course is designed for the advanced student who wishes to continue the study of mathematics beyond the Algebra level. Honors Geometry includes critical thinking, formal logic, exploration exercises, and real-life applications.
1110651 Semester 1  INTERMEDIATE ALGEBRA  1 Unit
1110652 Semester 2  Prerequisite: Teacher recommendation

This course is designed to reinforce basic algebraic concepts and enhance the students’ understanding of mathematical applications. Technology will be incorporated throughout the course.

1110401 Semester 1  ALGEBRA II – NCAA-approved  1 Unit
1110402 Semester 2  Prerequisite: Geometry

This course is designed for the student who wishes to continue the study of mathematics beyond geometry and is essential for students planning to attend college. Investigation of real-world applications will be incorporated throughout the course.

1110451 Semester 1  ALGEBRA II HONORS – NCAA-approved  1 Unit
1110452 Semester 2  Prerequisite: Geometry, meets Honors criteria (Completion of Algebra with a grade of 80% or higher; Standardized test score plus Geometry Semester average is 175 minimum)

This course is designed for the student who wishes to take a more rigorous approach to the study of advanced Algebra. Technology and investigation of real-world applications will be incorporated throughout the course.

1110431 Semester 1  ALGEBRA III – NCAA-approved  1 Unit
1110432 Semester 2  Prerequisite: Teacher recommendation following passing grade in Algebra II.

This course will enhance the higher level thinking skills developed in Algebra II through a more in-depth study of those concepts and exploration of some pre-calculus concepts. Students will be challenged to increase their understanding of algebraic, graphical and numerical methods to analyze, translate and solve quadratic, polynomial, rational, exponential and logarithmic functions and/or relations. Modeling real world situations is an important part of the course.

1110553  STATISTICS – NCAA-approved .5 Units
Prerequisite: Concurrent enrollment or completion of Algebra II or Senior who has successfully completed Intermediate Algebra.

This course is an introduction to elementary statistics including a wide variety of applications. It is appropriate for many disciplines such as: medicine, psychology, business, computer science, education, agriculture, and engineering. **TI-84 or higher Graphing Calculator is required.**

1110561 Semester 1  AP STATISTICS – NCAA-approved  1 Unit
1110562 Semester 2  Prerequisite: Algebra II or concurrent with Honors Algebra II and teacher recommendation.

Students will study the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The four broad conceptual themes are: exploring data, planning study, anticipating patterns, and statistical inference. **TI-84 or higher Graphing Calculator is required.** This is an Advanced Placement course that prepares the student to take the AP Statistics exam. Advanced credit, when available.

1110753  TRIGONOMETRY HONORS – NCAA-approved .5 Units
Prerequisite: Algebra II and teacher recommendation

The study of Trigonometry and its applications prepares students for a wide variety of career choices. This course combined with Math Analysis builds a strong foundation for future study in Calculus.
1110503  MATH ANALYSIS HONORS – NCAA-approved  .5 Units
Prerequisite: Algebra II and teacher recommendation

This course focuses on functional analysis through the integration of algebraic and geometric concepts. Math Analysis combined with Trigonometry builds a strong foundation for future study in Calculus.

1110601 Semester 1  AP CALCULUS AB – NCAA-approved  1 Unit
1110602 Semester 2  Prerequisite: Trigonometry Honors and Math Analysis Honors

This course is a college-level course with many applications in engineering and the sciences. Topics include: limits, derivatives and integration of a wide variety of functions, and applications of differentiation and integration. This is an Advanced Placement course that prepares the student to take the AP Calculus AB exam. Advanced credit, when available.

1110611 Semester 1  AP CALCULUS BC – NCAA-approved  1 Unit
1110612 Semester 2  Prerequisite: Trigonometry Honors and Math Analysis Honors
(Grade of “A” or “B” recommended)

This course is an extension of AP Calculus AB and addresses the same topics at an accelerated rate along with additional topics such as indeterminate forms, advanced techniques of integration, and a detailed study of sequences and series. This is an Advanced Placement course that prepares the student to take the AP Calculus BC exam. Advanced credit, when available.

PHYSICAL EDUCATION

0807003 PERSONAL LIFETIME FITNESS (Grade 9 Physical Education) .5 Units
(meets ½ the Physical Education requirement for graduation)
Prerequisite: Required for Grade 9

This course will provide the opportunity to develop and maintain fitness for a lifetime of wellness. Fitness concepts and components will be emphasized as the student participates in a wide variety of physical activities (fitness assessment and evaluation, individual sports, team sports, and other activities). This is a required class for graduation, and students may not enroll in elective P.E. classes without successful completion.

0807803 NINTH GRADE HEALTH .5 Units
Prerequisite: Required for Grade 9

This course is designed to engage students in activities that foster the development of each individual’s physical, mental, and emotional well-being leading to the adoption of effective health behaviors. A student-centered approach used in this course provides students the opportunity for accepting personal responsibility for a healthy, active lifestyle throughout their lifetime. This course fulfills the 0.5 Health requirement for graduation. NOTE: This course contains a unit on human sexuality. Missouri State statute (07.015) gives parents the right to remove their student from this portion of the course. Parents should contact the student's teacher if this option is chosen.

0807053 FITNESS FOR LIFE .5 Units
(Meets second ½ credit for physical education requirement for graduation)
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12

Fit for Life is designed to provide students with the knowledge and skills that are essential for creating a healthy lifestyle. In this class, students will participate in various low-impact resistance exercises designed to tone, stretch, strengthen, and sculpt muscles to improve body composition and fitness. Areas may include but are not limited to fitness testing, goal setting, circuit training, weight training, walking, jogging, yoga, interval training, stretching, various low-impact competitions, nutrition analysis and planning, and current event research.

0807013 CARDIO HEALTH .5 Units
(meets second ½ credit for physical education requirement for graduation)
Prerequisite: Personal Lifetime Fitness; Grade 10-12

Cardio Health covers a broad spectrum of curriculum related to many health and fitness issues. This course is designed to create opportunities for sound decision making that will lead to a healthy cardiovascular system. Students will develop critical-thinking skills through an understanding and application of exercise and nutrition principles. Areas covered may include, but are not limited to: cardiovascular workouts, fitness testing, planning fitness goals, resistance training, decision making, stress management, effects of drugs on the cardiovascular system, CPR and first aid, nutrition, and current events.

0807153 BASKETBALL/SOFTBALL/ FIELD SPORTS .5 Units
(meets second ½ credit for physical education requirement for graduation)
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12

Through the participation in several sports, students will gain the knowledge necessary to become an educated participant and spectator. The involvement in specific sports will provide an atmosphere that is enjoyable for the participants, promotes cooperation among peers and develops an appreciation for the degree of fitness necessary to participate. Games and skill activities will be designed in a manner that students can achieve success in individual and team play.
**0807203 VOLLEYBALL/ TENNIS/ BADMINTON** .5 Units
(meets second ½ credit for physical education requirement for graduation)
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12

Through the participation in several sports, students will gain the knowledge necessary to become an educated participant and spectator. The involvement in specific sports will provide an atmosphere that is enjoyable to the participants, promotes cooperation among peers and develops an appreciation for the degree of fitness necessary to participate. Games and skill activities will be designed in a manner that students can achieve success in individual and team play.

**0807253 WEIGHT TRAINING AND CONDITIONING I** .5 Units
(meets second ½ credit for physical education requirement for graduation)
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12

This course will provide an introduction to weight training with an emphasis on student participation. The student will be presented with the proper technique for a variety of weight training movements with an emphasis on learning proper movement rather than strength development. Grades will be determined through participation, written tests, and the completion of a workout journal/notebook.

**0807303 WEIGHT TRAINING AND CONDITIONING II** .5 Units
Prerequisite: Weight Training and Conditioning I with a grade of "C" or better, with Department approval, Grade 10-12

This course has two main objectives: development of an understanding of weight training as a lifetime physical activity and development of the skills necessary for the proper performance of strength training movements. The student will learn to design and implement their own individual work-out and keep track of their progress by keeping a required workout journal/notebook. Grades are determined through participation in class, written tests, and completion of their workout journal/notebook.

**0807333 WEIGHT TRAINING AND CONDITIONING III** .5 Units
Prerequisite: Weight Training and Conditioning II with a grade of "C" or better, with Department approval, Grade 11-12

This course has the following objectives: to continue the development of the individual workout plan designed in Weight Training II and to continue the progress toward the individual's strength and fitness goals. Students will identify the different muscles and muscle groups that are trained by the various exercises that are performed during the class. Grades are to be determined through participation, written tests, and their individual work-out journal/log.

**0807343 WEIGHT TRAINING AND CONDITIONING IV** .5 Units
Prerequisite: Weight Training and Conditioning III with a grade of "C" or better, with Department approval, Grade 11-12

This course has the following objectives: to continue the development of the individual's knowledge, strength, and cardiovascular endurance developed in the previous weight training courses. Students will develop knowledge, understanding and utilization of body composition, strength production, cardiovascular fitness, sport/activity specificity, and injury prevention and rehabilitation. Discussions will be held concerning current trends in strength and conditioning and the use of ergonomic aids as they apply to weight training. Grades will be determined through participation, written tests, and a completed workout journal/notebook.
**0807353 DRIVER'S EDUCATION/FIRST AID SAFETY .5 Units**  
*This course cannot be used for a required physical education credit; elective credit only  
Prerequisite: Must turn 15 prior to end of semester enrolled*  

This class provides familiarization with state driving laws, rules, and regulations by using the Missouri Driver's Guide. Students will learn basic defensive driver concepts, the responsibilities of being a vehicle owner/ operator (including maintenance and insurance information), and safe versus unsafe driving conditions as well as the effects of alcohol/drugs on driving. Knowledge and practice of basic first aid procedures, including CPR, will be addressed through this course. *Students have the option of participating for a fee in an instructional driving experience.*

**0807453 OUTDOOR EDUCATION I .5 Units**  
*This course cannot be used for a required physical education credit; elective credit only  
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12*  

This course will provide basic information on hunter ethics and tradition, hunting seasons, regulations, strategies, hunter safety course, proper gun handling, firearms and safety, outdoor emergencies and survival skills, and an awareness of Missouri's outdoors. Students will be participating in some outdoor activities.

**0807503 OUTDOOR EDUCATION II .5 Units**  
*This course cannot be used for a required physical education credit; elective credit only  
Prerequisite: Pass Personal Lifetime Fitness, Grade 10-12*  

This course will provide basic information about different types of fishing, fishing equipment, skills of casting, fish identification, camping and hiking, regulations and responsibilities of the fisherman, map and compass, archery, boating/safety, water sports, outdoor emergencies and survival skills, and an awareness of Missouri's outdoors. Students will be participating in some outdoor activities.

**0807853 TEEN HEALTH AND WELLNESS .5 Units**  
*This course cannot be used for a required physical education credit; elective credit only  
Prerequisite: Pass 9th Grade Health, Grade 11-12*  

This class focuses on specific health issues and/or emerging trends in health and wellness, and is offered as an elective for juniors and seniors. It will explore current health careers and trends as related to the teenage student. Students will gain awareness that health is not just the absence of disease but the positive state of physical, mental, and social well-being that promotes wellness. Topics will include health careers, adolescent mental health, communicable diseases, prevention behaviors, substance abuse and other current issues that affect everyday teen living.

---

**PRE-ENGINEERING and BIOMEDICAL SCIENCES PROGRAMS**  
**Project Lead the Way (PLTW)**

**1009501 Semester 1**  
**1009502 Semester 2**  
**INTRODUCTION TO ENGINEERING DESIGN 1 Unit**  
Qualifies for Honors credit when a 6 or higher (9 maximum) is earned on the PLTW final exam.

This is a foundation course in the pre-engineering Project Lead the Way (PLTW) curriculum sequence that offers a dynamic high school program providing students with real-world learning and hands-on experience. Students interested in engineering, biomechanics, aeronautics, and other applied math and science arenas will discover PLTW is an exciting portal into these industries. The major focus of the course is to expose students to the design
process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards and technical documentation. Students use 3D solid modeling software to help them design solutions to solve proposed problems and learn how to document their work and communicate solutions to peers and members of the professional community.

1009551 Semester 1  
1009552 Semester 2  
PRINCIPLES OF ENGINEERING  
1 Unit
Prerequisite: Introduction to Engineering Design  
Note: A grade of “C” or better in Introduction to Engineering Design recommended;  
Qualifies for Honors credit when a 6 or higher (9 maximum) is earned on the PLTW final exam.

This is a foundation course in the pre-engineering Project Lead the Way (PLTW) curriculum sequence that offers a dynamic high school program providing students with real-world learning and hands-on experience. Students interested in engineering, biomechanics, aeronautics, and other applied math and science arenas will discover PLTW is an exciting portal into these industries. This survey course of engineering exposes students to major concepts they will encounter in a postsecondary engineering course of study. Students employ engineering and scientific concepts in the solution of engineering design problems. They develop problem solving skills and apply their knowledge of research and design to create solutions to various challenges, documenting their work and communicating solutions to peers and members of the professional community.

1009601 Semester 1  
1009602 Semester 2  
DIGITAL ELECTRONICS  
1 Unit
Prerequisite: Introduction to Engineering Design and Principles of Engineering  
Note: A grade of “C” or better in prerequisites recommended  
Qualifies for Honors credit when a 6 or higher (9 maximum) is earned on the PLTW final exam.

This is a specialized course in the pre-engineering PLTW curriculum sequence that offers a dynamic high school program providing students with real-world learning and hands-on experience. Students interested in engineering, biomechanics, aeronautics, and other applied math and science arenas will discover PLTW is an exciting portal into these industries. Digital electronics is the foundation of all modern electronic devices such as cellular phones, MP3 players, laptop computers, digital cameras and high-definition televisions. The major focus of the digital electronics course is to expose students to the process of combinational and sequential logic design, teamwork, communication methods, engineering standards and technical documentation. This course is designed for 10th, 11th and 12th grade students.

1009651 Semester 1  
1009652 Semester 2  
ENGINEERING DESIGN AND DEVELOPMENT  
1 Unit
Prerequisite: Introduction to Engineering Design, Principles of Engineering and Digital Electronics  
Note: A grade of “C” or better in prerequisites recommended  
Qualifies for Honors credit when a 6 or higher (9 maximum) is earned on the PLTW final exam.

In this capstone course, students work in teams to design and develop an original solution to a valid open-ended technical problem by applying the engineering design process. Students perform research to choose, validate, and justify a technical problem. After carefully defining the problem, teams design, build, and test their solutions while working closely with industry professionals who provide mentoring opportunities. Finally, student teams present and defend their original solution to an outside panel. This course is appropriate for 12th grade students.
The PLTW Biomedical Sciences Program is a Project Lead the Way (PLTW) curriculum sequence which follows a proven hands-on, real-world problem-solving approach to learning. Students explore the concepts of human medicine and are introduced to topics such as physiology, genetics, microbiology and public health. Through activities, like dissecting a heart, students examine the processes, structures and interactions of the human body – often playing the role of biomedical professionals. They also explore the prevention, diagnosis and treatment of disease, working collaboratively to investigate and design innovative solutions to the health challenges of the 21st century such as fighting cancer with nanotechnology. Students also acquire strong teamwork and communication practices, and develop organizational, critical-thinking, and problem-solving skills. Along the way students investigate a variety of careers in biomedical sciences. The program is designed to prepare students to pursue a post-secondary education and careers in the biomedical sciences.

Principal's of the Biomedical Sciences is the first of 4 courses in the biomedical sciences sequence that are planned to be phased-in over the next four years (see below for the phase-in process). Students investigate various health conditions including heart disease, diabetes, sickle-cell disease, hypercholesterolemia, and infectious diseases. They determine the factors that led to the death of a fictional person, and investigate lifestyle choices and medical treatments that might have prolonged the person’s life. The activities and projects introduce students to human physiology, medicine, and research processes. This course provides an overview of all the courses in the Biomedical Sciences program and lays the scientific foundation for subsequent courses. This course is designed for 9th, 10th, 11th and 12th grade students.

**Anticipated Phase-in Process and Sequence for the PLTW Biomedical Science Program**

**2015-16**

**Human Body Systems**
Students examine the interactions of human body systems as they design experiments, investigate the structures and functions of the human body, and use data acquisition software to monitor body functions.

**2016-17**

**Medical Interventions**
Students investigate a variety of interventions involved in the prevention, diagnosis and treatment of disease as they follow the life of a fictitious family.

**2017-18**

**Biomedical Innovations**
In this capstone course, students design innovative solutions for the health challenges of the 21st century and have the opportunity to work on an independent project with a mentor or advisor from a university, hospital, research institution, or the biomedical industry.

---

**SCIENCE**

**1312001 Semester 1**

**PHYSICAL SCIENCE – NCAA-approved**

**1 Unit**

Required of all Grade 9 students

Physical Science is an introductory course to the concepts of chemistry and physics. It covers atomic theory, physical and chemical properties of matter, Conservation of Matter, energy transformations, thermodynamics, linear motion, forces, Newton’s laws, energy, and nuclear properties. Lab experiences, scientific inquiry, and problem-solving are used to emphasize scientific concepts. This course serves as a foundation for the study of other sciences.
Physical Science Honors is for the advanced science student. Physical Science Honors is an introductory course to the study of chemistry and physics. It covers atomic theory, physical and chemical properties of matter, Conservation of Matter, energy transformations, thermodynamics, linear motion, forces, Newton’s laws, energy, and nuclear properties. Lab experiences, scientific inquiry, advanced thinking and problem-solving skills are used to emphasize scientific concepts. This class will provide a foundation for advanced science courses. This course requires a high degree of independent initiative.

In this course the student will engage in scientific inquiry, explore biochemistry, the cell, bio-energy, mechanisms of genetics, and biotechnology. Students will also study change in organisms over time, classification, and ecosystems. Lab experiences are an integral part of the course.

In this course the student will engage in scientific inquiry, biochemistry, the cell, bio-energy, mechanisms of genetics, biotechnology, change in organisms over time, classification, and ecosystems. Lab experiences are an integral part of the course. This course will emphasize critical thinking as well as advanced reading, writing, and problem solving skills. This class will provide a foundation for advanced science courses. This course requires a high degree of independent initiative.

This course is designed for the advanced and committed biology student (Honors Biology and Honors Chemistry are recommended.) Topics include biochemistry, cellular energy, heredity, molecular genetics, evolution, diversity of organisms, and ecology. Lab experiences are an integral part of the course. This course will emphasize critical thinking as well as advanced reading, writing, and problem-solving skills. This course requires a high degree of independent initiative and is a preparatory course for the AP Biology exam. Advanced credit, when available.

This course is highly recommended for students planning on enrolling in college or technical school. General Chemistry is the fundamental course in the study of matter and energy. Topics include: experiment design, measurement skills, atomic theory, classification of matter, nomenclature, stoichiometry, gas laws, periodic table, chemical bonding, solutions, and acids and bases. Lab experiences are an integral part of the course.

This course is highly recommended for college-bound students. In this course, students will be introduced to the study of the composition and properties of matter. Topics include measurement skills, atomic theory, classification
of matter, nomenclature, stoichiometry, gas laws, periodic table, chemical bonding, solutions, and acids and bases. Lab experiences are an integral part of this course. This course will emphasize critical thinking as well as advanced reading, writing, and problem-solving skills. This course requires a high degree of independent initiative.

1312551 Semester 1  AP CHEMISTRY II – NCAA-approved 1 Unit
1312552 Semester 2  

Prerequisite: Completion of Chemistry I Pre-AP and Algebra II, with a grade of B or better. Chemistry I may be substituted for Chemistry I Pre-AP with approval of the AP Chemistry instructor.

This course is designed for the advanced and committed chemistry student. Topics include: solutions, physical behaviors of gases, thermochemistry, electrochemistry, Kinetic Theory, and chemical equilibria. Lab experiences are an integral part of course. This course will emphasize critical thinking as well as advance reading, writing, and problem-solving skills. This is an Advanced Placement course that prepares the student to take the AP Chemistry exam. Advanced credit, when available. This course requires a high degree of independent initiative.

1312601 Semester 1  PHYSICS I – NCAA-approved 1 Unit
1312602 Semester 2  

Prerequisite: Concurrent enrollment in or completion of Algebra II or teacher recommendation

This course is designed for the intermediate to advanced student that has solid algebra skills. The course will cover standard topics of entry level physics including: linear motion, circular motion, two dimensional motion, forces, Newton’s Laws, energy, electricity, magnetism and introductory atomic and nuclear structures. Students will develop problem-solving skills through lab activities, interactive software, problem sets and classroom discussions.

1312651 Semester 1  PRE-AP PHYSICS I – NCAA-approved 1 Unit
1312652 Semester 2  

Prerequisite: Completion of Algebra II with a grade of “B” or better; concurrent enrollment in Trigonometry recommended; meet honors criteria

This course is designed for the advanced physics student who is comfortable in applying problem-solving skills and higher level mathematics. Topics include: linear motion, projectile motion, rotational motion, force, energy, momentum, vectors, fluid and thermodynamics, electricity and magnetism, and introductory atomic and nuclear structures. The student should have solid algebra skills and have been introduced to trigonometry. Concepts will be developed through lab activities and lecture. This course requires a high degree of independent initiative.

1312851 Semester 1  AP PHYSICS II – NCAA-approved 1 Unit
1312852 Semester 2  

Prerequisite: Pre-AP Physics I with a grade of “B” or better or teacher recommendation; concurrent enrollment in Calculus recommended

This is a laboratory and mathematical intensive course. This course will build on the problem-solving skills developed and concepts learned in Physics I. Topics include: Newtonian mechanics, electricity and magnetism. Students should have extensive algebra and trigonometric skills. This course requires a high degree of independent initiative. This is a preparatory course for the AP Physics exam. Advanced credit, when available.

1312701 Semester 1  ENVIRONMENTAL STUDIES – NCAA-approved 1 Unit
1312702 Semester 2  

Prerequisite: Completion of Biology

The student will explore various fundamental and advanced ecological concepts. Topics include: Foundations of Environmental Studies, water quality, solid waste management, air quality, human population, energy ecosystems, and biodiversity. Environmental responsibility will be emphasized through class discussions, lab situations, and fieldwork.
Students will study the universality of change from the rock cycle through plate tectonics, as well as weather and the Earth’s position in space. Topics include: physical properties of matter, rocks and minerals, weathering and erosion, historical geology, plate tectonics, volcanism and earthquakes, weather, natural disasters, and astronomy. Lab experiences are an integral part of this course.

This is a rigorous course where students will study medical terminology, eleven body systems and their associated organs, and diseases associated with each human system. Students will learn through inquiry based lessons and laboratory experiences including dissections. This course requires a high degree of independent initiative.

This is a rigorous course where students will study the classification, structures and functions, and the life cycles (reproduction) of plants and animals with emphasis on local flora and fauna. Students will learn through inquiry based lessons, specimen collections, specimen dissection, live specimen lab work and research. This course requires a high degree of independent initiative.

This is a rigorous course where students will study the science of genetics. Topics will include: human cellular processes, DNA and the processes associated with it, genetic inheritance with an emphasis on genetic abnormalities, immunity and cancer, human biotechnology, gene therapy, and microbiology. Students will learn through inquiry based lessons, research, and laboratory experiences. This course requires a high degree of independent initiative.

The PLTW Biomedical Sciences Program is a Project Lead the Way (PLTW) curriculum sequence which follows a proven hands-on, real-world problem-solving approach to learning. Students explore the concepts of human medicine and are introduced to topics such as physiology, genetics, microbiology and public health. Through activities, like dissecting a heart, students examine the processes, structures and interactions of the human body – often playing the role of biomedical professionals. They also explore the prevention, diagnosis and treatment of disease, working collaboratively to investigate and design innovative solutions to the health challenges of the 21st century such as fighting cancer with nanotechnology. Students also acquire strong teamwork and communication practices, and develop organizational, critical-thinking, and problem-solving skills. Along the way students investigate a variety of careers in biomedical sciences. The program is designed to prepare students to pursue a post-secondary education and careers in the biomedical sciences.

Principles of the Biomedical Sciences is the first of 4 courses in the biomedical sciences sequence that are planned to be phased-in over the next four years (see below for the phase-in process). Students investigate various health conditions including heart disease, diabetes, sickle-cell disease, hypercholesterolemia, and infectious diseases. They determine the factors that led to the death of a fictional person, and investigate lifestyle
choices and medical treatments that might have prolonged the person’s life. The activities and projects introduce students to human physiology, medicine, and research processes. This course provides an overview of all the courses in the Biomedical Sciences program and lays the scientific foundation for subsequent courses. This course is designed for 9th, 10th, 11th and 12th grade students.

Anticipated Phase-in Process and Sequence for the PLTW Biomedical Science Program

2015-16 Human Body Systems
Students examine the interactions of human body systems as they design experiments, investigate the structures and functions of the human body, and use data acquisition software to monitor body functions.

2016-17 Medical Interventions
Students investigate a variety of interventions involved in the prevention, diagnosis and treatment of disease as they follow the life of a fictitious family.

2017-18 Biomedical Innovations
In this capstone course, students design innovative solutions for the health challenges of the 21st century and have the opportunity to work on an independent project with a mentor or advisor from a university, hospital, research institution, or the biomedical industry.

1312721 Semester 1  AP ENVIRONMENTAL SCIENCE A (Online) – NCAA-approved  1 Unit
1312722 Semester 2

Prerequisite: A grade of “C” or better in two years of laboratory sciences is recommended. Algebra I and Algebra II are required, although Algebra II can be taken concurrently.

AP Environmental Science is a yearlong examination of the interrelationships of the natural world. Students identify and analyze environmental problems and their effects, and evaluate the effectiveness of proposed solutions. Students learn to think like environmental scientists: making predictions based on observations, writing hypothesis, designing and completing field studies and experiments, and reaching conclusions based on the analysis of data derived from these experiments. Students apply the concepts of environmental science to their everyday experiences and current events and issues in science, politics, and society. The course provides opportunities for guided inquiry and student-centered learning to foster critical thinking skills. This course is presented online and the student will be required to complete coursework to the established timeline provided by the virtual instructor. Successful completion of this course is dependent on the student’s ability to meet the criteria outlined by the virtual instructor’s syllabus. This online course is considered an 8th hour course offering. Students will be responsible for their pacing in the course.
Francis Howell School District
High School Science Courses

Graduation Requirements:
3.0 units of science credit

College Preparatory Recommendations:
4.0 (or more) units of science credit

This course will develop student understanding and competence in American citizenship. During the first semester students will focus on the heritage of American government, the U.S. Constitution, and the branches of government. During the second semester students will focus on politics and elections, civil liberties and civil rights, citizenship, foreign policy, and state and local government. This course will fulfill Missouri state graduation requirements. Students will be required to pass the Missouri Constitution Test and the United States Constitution Test with at least a 70%. This course has an End-of-Course test.
### AP GOVERNMENT AND POLITICS – NCAA-approved

**1 Unit**

Prerequisite: Grade 11 or 12 or transfer

This course is an introductory college course in United States government and politics. This course includes both the study of general concepts used to interpret U.S. government and politics and the analysis of specific examples. It also requires familiarity with the various institutions, groups, beliefs, and ideas that constitute U.S. government and politics. Objectives for the course include knowing important facts, concepts, and theories pertaining to U.S. government and politics; understanding typical patterns of political processes and behavior and their consequences (including the components of political behavior, the principles used to explain or justify various government structures and procedures, and the political effects of these structures and procedures); being able to analyze and interpret basic data relevant to U.S. government and politics (including data presented in charts, tables, and other formats); and being able to critically analyze relevant theories and concepts, apply them appropriately, and develop their connections across the curriculum. Emphasis will be placed on the advanced development of reading, writing, and critical thinking skills, particularly in the analysis of data and sources. Students may earn up to 6 hours of credit through the Advanced Credit Program, when available, or may choose to take the Advanced Placement U.S. Government and Politics exam. This course will fulfill Missouri state graduation requirements. Students will be required to pass the Missouri Constitution Test and the United States Constitution Test with at least a 70%. This course has an End-of-Course test.

### AP EUROPEAN HISTORY – NCAA-approved

**1 Unit**

Prerequisite: Grade 11 or 12 transfer

This course will begin with the foundations of western civilization and follow its development in Europe through modern times. The study of European history since 1450 introduces students to cultural, economic, political, and social developments that played a fundamental role in shaping the world in which they live. Without this knowledge, we would lack the context for understanding the development of contemporary institutions, the role of continuity and change in present-day society and politics, the evolution of current forms of artistic expression and intellectual discourse. In addition to providing a basic narrative of events and movements, the goals of this course are to develop (a) an understanding of some of the principle themes in modern European history, (b) an ability to analyze historical evidence and historical interpretations, and (c) an ability to express historical understanding in writing. Emphasis will be placed on the advanced development of reading, writing, and critical thinking skills, particularly in the analysis of historical data and sources. Students may earn up to 6 hours of credit through the Advanced Credit Program, when available, or may choose to take the Advanced Placement European History exam.

### PSYCHOLOGY – NCAA-approved

**.5 Units**

Prerequisite: Grade 11-12

This course is an introduction to the study of human behavior. Topics include a brief introduction to the history and development of psychology as a science, methods of psychological research, processes of sensation and perception, intelligence and creativity, principles of learning, process of remembering and forgetting, thinking, biological influences on behavior, motivation and emotions, understanding and measuring personality, and the identification and treatment of various psychological disturbances. Students will continue to develop skills in organizing materials, note-taking, communications, researching, and critical thinking.

### SOCIOLOGY – NCAA-approved

**.5 Units**

Prerequisite: Grade 11-12

Sociology is the study of group dynamics. The student will explore subjects such as socialization, culture and group interaction, social structure, communal change and societal problems. Students will learn basic skills in sociological research, will be able to define key sociology terms, and will be encouraged to relate sociological concepts to their own lives. Finally, students will identify the contributions sociology has made to improve the
human condition. Students will continue to develop skills in organizing materials, note-taking, communicating, research, and critical thinking.

1513603  CONTEMPORARY ISSUES – NCAA-approved  .5 Units
Prerequisite: Grade 11-12

This course will involve students with the issues, problems, and events in our world today. State, local, national, and international issues will be highlighted on a continuing basis. Emphasis will be placed on the inter-relationship of concepts from the various social sciences - psychology, sociology, economics, and political science - and how they relate to the issues and events mentioned above. A national news magazine will serve as the primary text for the course, with other sources used for historical background and additional data. Students will continue to develop skills in organizing materials, note-taking, communicating, research, and critical thinking.

1513901 Semester 1  AP UNITED STATES HISTORY – NCAA-approved  1 Unit
1513902 Semester 2  Prerequisite: Grade 11 or 12 or transfer

This course will focus on our nation's history from discovery and colonization to the present. The AP U.S. History course is designed to deal critically with the problems and materials in U.S. history. The program prepares students for intermediate and advanced college courses by making demands upon them equivalent to those made by full-year introductory college courses. Students will learn to assess historical materials-their relevance to a given interpretive problem, reliability, and importance-and to weigh the evidence and interpretations presented in historical scholarship. This course will develop the skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively in essay format. Emphasis will be placed on the advanced development of reading, writing, and critical thinking skills, particularly in the analysis of historical data and primary sources. Students may earn up to 6 hours of credit through the Advanced Credit Program, when available, or may choose to take the Advanced Placement United States History exam.

1514151 Semester 1  AP WORLD HISTORY – NCAA-approved  1 Unit
1514152 Semester 2  Prerequisite: Grade 11 or 12; Grade 10 upon recommendation of AP Committee

This course invites students to take a global view of historical processes and contacts between people in different societies, with an emphasis on the past thousand years. Students will be expected to learn selective factual knowledge in addition to certain analytical skills. Major interpretive issues among historians will be explored, as well as techniques used in interpreting both primary historical evidence and secondary sources. Themes will be employed throughout the course, though the basic approach will be chronological. Students will pay particular attention to change and continuity over time, to the characteristic institutions and values of societies, and to the way such institutions and values are affected as a result of cultural contacts among peoples. Emphasis will be placed on the advanced development of reading, writing, and critical thinking skills, particularly in the analysis of historical data and primary sources. Students may earn up to 6 hours of credit through the Advanced Credit Program, when available, or may choose to take the Advanced Placement World History exam.

1513771 Semester 1  AP PSYCHOLOGY – NCAA-approved  1 Unit
1513772 Semester 2  Prerequisite: Grade 11 or 12 or transfer

This course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings, and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. Emphasis will be placed on the advanced development of reading, writing, and critical thinking skills. Students may earn up to 6 hours of credit through the Advanced Credit Program, when available, or may choose to take the Advanced Placement Psychology exam.
The AP Geography course is designed to provide college level instruction on the patterns and processes that impact the way humans understand, use, and change Earth's surface. Students use geographic models, methods, and tools to examine human social organization and its effect on the world in which we live. Students are challenged to use maps and geographical data to examine spatial patterns and analyze the changing interconnections among people and places. This course is presented online and the student will be required to complete coursework to the established timeline provided by the virtual instructor. Successful completion of this course is dependent on the student's ability to meet the criteria outlined by the virtual instructor's syllabus.

ACT Prep skills is an elective course designed to prepare students for the ACT test. Students will learn test-taking strategies in addition to skills and knowledge associated with the tested content areas of English, Math, Reading, Science and Writing. Students enrolled in the course will be encouraged to take the ACT test.

World Language Level I is designed to introduce students to the fundamentals of the target language. Emphasis will be placed on acquisition of vocabulary and basic grammar through reading, writing, speaking, and listening. The study of people, culture, customs, and geography of the target-language countries will be integrated throughout the course. This course is a prerequisite for the AP World Language class.

This course is designed for students who have already completed Level I, or equivalent, in middle school or high school. In this course, students will increase their knowledge of target-language vocabulary and grammar. Emphasis will continue to be placed on development of reading, writing, speaking, and listening skills. Students will apply these concepts in original verbal and written communication. This course is a prerequisite for the AP World Language class.
PRE-AP WORLD LANGUAGE III – NCAA-approved 1 Unit

**SPECIFY LANGUAGE:**

- FRENCH Semester 1: 0616101 Semester 2: 0616102
- GERMAN Semester 1: 0616351 Semester 2: 0616352
- SPANISH Semester 1: 0616601 Semester 2: 0616602

Qualifies for the honors program
Prerequisite: "C" average or above in Level II, or equivalent, is required

It is recommended that native speakers of the language begin at this level.

In this honors class, students will continue to develop mastery of grammar, vocabulary, listening, reading skills, creative writing, and spontaneous speaking. Students will be provided with opportunities to explore the cultures and geography of the various target-language speaking regions. Students may elect to receive 5 credit hours through the Advanced Credit program at the University of Missouri - St. Louis, when available. This course is a prerequisite for the AP World Language class.

PRE-AP WORLD LANGUAGE IV – NCAA-approved 1 Unit

**SPECIFY LANGUAGE:**

- FRENCH Semester 1: 0616151 Semester 2: 0616152
- GERMAN Semester 1: 0616401 Semester 2: 0616402
- SPANISH Semester 1: 0616651 Semester 2: 0616652

Qualifies for the honors program
Prerequisite: "C" average or above in Level III is required

In this honors class, students will continue to develop and perfect their ability to express themselves in original oral and written communication. Listening and reading selections will be implemented to enhance understanding, appreciation and respect for target language speaking people and their cultures. Students may elect to receive 5 credit hours through the Advanced Credit program at the University of Missouri - St. Louis, when available. This course is a prerequisite for the AP World Language class.

AP WORLD LANGUAGE & CULTURE – NCAA-approved 1 Unit

**SPECIFY LANGUAGE:**

- FRENCH Semester 1: 0616751 Semester 2: 0616752
- GERMAN Semester 1: 0616801 Semester 2: 0616802
- SPANISH Semester 1: 0616851 Semester 2: 0616852

Qualifies for the honors program
Prerequisite: "C" average or above in Level IV is required

In this Advanced Placement class, students will continue to develop and perfect listening comprehension, speaking, reading, and writing skills as well as continue acquisition of cultural awareness and appreciation. Previous and new grammar concepts will be presented through units of study, which may include immersion activities, readings in contemporary and classical literature, history, art, music, geography, and essay writing. Focus will be placed on preparing students to take the Advanced Placement exam in the Spring if they choose to do so. Students may also elect to receive 3 credit hours through the Advanced Credit program at the University of Missouri - St. Louis, when available.
TRANSITION SKILLS .5-1 Units
3022601 Semester 1 / 3022602 Semester 2
2622601 Semester 1 / 2622602 Semester 2
2822601 Semester 1 / 2822602 Semester 2
Prerequisite: Special Education placement

This course is designed to aid special education students in grades 9-12 in achieving successful post-secondary outcomes and create lifelong learners. Students will develop an awareness of career, educational and independent living skills to assist them in employment, education and personal goals. Students will be taught self-awareness, career research, and exploration of post-secondary educational/training options, rights and responsibilities, test taking strategies, basic living skills and financial responsibility.

S.T.U.D.I.E.S I (Strategies and Techniques for Understanding, Developing Independent, and Effective Students) .5-1 Units
2622211 Semester 1 / 2622212 Semester 2
2822211 Semester 1 / 2822212 Semester 2
2922211 Semester 1 / 2922212 Semester 2
Prerequisite: Special Education placement

This course is designed to teach students with disabilities in 9th grade to adjust to the new high school environment and to become independent learners as well as teach students skills needed to succeed in the general education setting. Areas of emphasis include: transition to high school, study skills and personal skills.

S.T.U.D.I.E.S II (Strategies and Techniques for Understanding, Developing Independent, and Effective Students) .5-1 Units
2622221 Semester 1 / 2622222 Semester 2
2822221 Semester 1 / 2822222 Semester 2
2922221 Semester 1 / 2922222 Semester 2
Prerequisite: Special Education placement

This course is designed to teach students with disabilities in 10th grade students to adjust to more demands as a young adult and to become more independent learners. This course also teaches students the skills needed to succeed in the general education and community setting, such as employment/dating. Areas of emphasis include: transition to high school and the community, study skills, and personal skills.

S.T.U.D.I.E.S III (Strategies and Techniques for Understanding, Developing Independent, and Effective Students) .5-1 Units
2622231 Semester 1 / 2622232 Semester 2
2822231 Semester 1 / 2822232 Semester 2
2922231 Semester 1 / 2922232 Semester 2
Prerequisite: Special Education placement

This course is designed to teach students with disabilities in 11th or 12th grade to self advocate and to become independent learners as well as teach students skills needed to succeed in the post-secondary setting. Areas of emphasis include: transition to post-secondary, study skills and personal skills, such as setting long and short term goals, self advocacy, and self-determination.
WORK EXPERIENCE FIELD WORK  
2628001 Semester 1 / 2628002 Semester 2  
2822201 Semester 1 / 2822202 Semester 2  
Prerequisite: Special Education Placement and Vocational Rehabilitation acceptance

This course works in conjunction with all special education programs. The course is intended to allow students involved in special services programs to receive academic credit while actively participating in work experience. The program will encourage students to gain vocational experience while offering each participant direction in the development of realistic vocational goals that will result in successful integration into the working community upon graduation. Students may earn up to 2 credits per academic school year.

2628303  
COLLEGE 101 – ORIENTATION TO COLLEGE  
Prerequisite: Special Education Placement, Grade 12 and teacher recommendation

Orientation to College has been designed to assist students with transition to college life. Specifically, the class will examine the transitions that take place and develop the strategies to cope with them. This course will focus upon group building and creating a “belonging place” for new students. Through a variety of in class and home exercises, students will be encouraged to explore values, goals, and self-determination skills. Students will be directed to key support services and college resources to enhance the quality of the college experience.

LEWIS AND CLARK CAREER CENTER

Enrollment is a competitive process at each sending school. Students who want to be considered for a technical program need to complete a Lewis & Clark application form and return it to their home school guidance office.

Student information is compiled regarding grades, attendance, discipline patterns and aptitude testing. Students who have completed the entire application procedure will be rated. Enrollment is based on the cooperative decision of the enrollment team at each sending school. For priority consideration, students need to complete the application procedure including testing by the enrollment date set annually at each sending school. Applications received after enrollment will be considered on a space available basis.

All classes at Lewis & Clark Career Center meet for three periods each day and earn three units of credit per year. Articulation agreements are in place in certain programs for qualified students who complete their program. Students who complete the technical program with a minimum of 90% attendance and 75% average over the length of the program will receive a silver certificate of completion. A gold certificate will be awarded to students who maintain 95% attendance and 95% academic average over the length of the program, no discipline resulting in loss of class time, and leadership as determined by the instructor.

Students who attend Lewis & Clark Career Center follow the St. Charles District Code of Conduct and Grading Scale.

AUTO COLLISION REPAIR  
2 year program; 3 units of credit per year

This course is open to juniors who have an interest in auto collision repair as a wage earning occupation. One year of the two year program will concentrate on non-structural repair methods. These include mig welding, straightening and aligning sheet metal, applying and shaping plastic fillers, plastic panel identification and plastic repair methods. Mechanical, electrical and glass installation will also be covered.

One year of the two year program will concentrate on painting and refinishing. Students will learn proper paint preparation procedures, masking techniques and detailing cars. Primer, sealer and basecoat/clearcoat application will be covered along with paint defect identification and repair. Proper spray gun techniques will be taught and
practiced with lots of hands on spraying of primers, paints and clears.

Both years customer satisfaction, measuring and damage analysis along with writing a damage report will be covered. The course is geared to prepare students for entry level auto collision repair and to help prepare for the ASE (Automotive Service Excellence) certification tests. The curriculum is based on the I-CAR (Inter-Industry Conference on Auto Collision Repair) instruction and is used throughout the course.

**AUTO SERVICE TECHNOLOGY**

2 year program; 3 units of credit per year

This course is open to individuals who have an interest in auto-service trades in terms of a career goal. It is recommended that the student have credit in general shop, a general metals course, and basic computer skills.

Automotive instruction at Lewis and Clark consists of a two-year program, which provides the student with the basic theory and skills needed to become an entry-level automotive technician and service today's automobiles. Classroom instruction is followed by shop activities related to the lecture. Customer cars are repaired in the same manner as in the professional shop under the instructor's supervision. Students will gain experience in shop management by writing repair orders, ordering parts, and issuing supplies and tools used in the trade.

This course is ASE (Automotive Service Excellence) certified by NATEF (National Automotive Technician Education Foundation). Both NATEF and ASE are nationally recognized and provide certification for shops and technicians across the country. Areas of instruction include: engine repair, brakes, steering and suspension, heating/air conditioning, electrical/electronics, engine performance, and basic manual/automatic transmission.

Instructional time is approximately 50% class and 50% lab.

**BRICK & STONE MASONRY**

2 year program; 3 units of credit per year

This program is designed to prepare students for apprenticeship or entry-level jobs in masonry construction. Students will learn to lay brick and block in various bond patterns used in commercial and residential construction. Course will include construction techniques for building fireplaces and chimneys, arches, special wall openings, double wythe and reinforced masonry, wall anchoring systems, flashings and prevention of water penetration and masonry paving. Students will also gain knowledge of various types of stone construction and tuckpointing.

Units of study will cover safety practices and procedures; tools and equipment used in masonry construction; properties, sizes and uses of clay and concrete masonry units; experience in laying brick, block and stone in various bond patterns; reinforced masonry walls; masonry veneer construction; layout and construction of fireplaces and chimneys; mathematics for masonry and measuring systems; blueprint reading and construction plans.

Students must be able to work at heights on scaffolds, lift and handle heavy materials, work in group situations as a team member, follow instructions and accomplish all tasks in an accurate and safe manner.

**BUILDING TRADES – CARPENTRY**

2 year program; 3 units of credit per year

This course is open to juniors who show an interest and aptitude in the field of construction as a wage earning occupation. Students are familiarized with entry level skills for the major trades involved in residential construction such as carpentry, siding, interior trim, drywall hanging, roofing, concrete work and landscaping.

Most of the program involves the actual building of a house in Lewis & Clark Career Center's own subdivision. Students not only gain experience in home construction, but also will learn about subdivision construction. Houses are sold upon completion. Students will gain experience in building both a single and a two-story dwelling.

It is recommended that students have one year of industrial arts.
COMPUTER INFORMATION SYSTEMS 1 year program; 3 units of credit
Prerequisite: 10th grade reading and 8th grade or higher math

This program is open to juniors, seniors and post-secondary students who have an interest in computer programming or database administration as a wage earning occupation or post-secondary degree.

Students will learn beginning and intermediate business programming and business communication concepts. They will learn the basics of the C++ and C# programming languages and database administration and design skills. The students will complete a final project that will incorporate all facets of the class.

Students who successfully complete this program will be able to develop business and other forms of software application or serve as an entry-level database administrator. Graduates may be employed by software development or consulting firms, or may continue on to a college level degree program.

COMPUTER INFORMATION SYSTEMS-2ND YEAR 1 year program; 3 units of credit
Prerequisites: 10th grade reading and 8th grade or higher math, CIS 1st year with 85% or higher after 1st semester, no disciplinary issues, and have instructor approval.

This program is open to seniors and post-secondary students who have an interest in more advanced computer programming or web design as a wage earning occupation or post-secondary degree.

Students will choose between three paths: business programming, graphics programming and development, or web design. If they choose the business programming path, they will learn advanced database design concepts and how to work with databases in the C++ and C# language using Microsoft SQL Server. If they choose the graphics programming/development path, they will learn advanced techniques for programming utilizing DirectX and Open GL. If they choose the web design path, they will learn advanced HTML including DHTML, CSS, and advanced Flash. They will be asked to complete large scale projects and assist in instruction in their chosen pathway.

Students who successfully complete this program will be able to develop advanced applications in their chosen path. Graduates may be employed by software development or consulting firms, or continue on to a college level degree programs.

COMPUTER MAINTENANCE AND NETWORKING 1 year program; 3 units of credit

This program is open to juniors and seniors who have an interest in the Information Technology field and want to earn their first certification as an IT technician.

Students who successfully complete this program will be able to work as an entry level help desk technician, a computer repair technician, or a computer support technician in all types of business and industry.

An interest in technology, keyboarding skills and familiarity with Word & PowerPoint are essential.

ARCHITECTURAL DESIGN 1 or 2 year program; 3 units of credit per year

Architectural Design is a one or two year course designed for students intending to enter the architectural or engineering design fields. The program is structured so that upon completion, the student will be qualified to enter a wide variety of architectural or engineering careers at an entry level. The student will also be very well prepared to further their education at post-high school training facilities and and/or colleges and universities.

Year one focuses on basic drafting skills utilizing AutoCAD, with an emphasis on residential architecture. The students will learn architectural design as well as basic structural and civil engineering requirements for residential construction, including drawing techniques and materials. The students will learn about building codes and how they apply to residential construction. The students will be able to design their own home and produce a detailed set of construction documents (capable of obtaining a building permit) for that home.
Year two focuses on basic drafting skills utilizing AutoCAD, with an emphasis on commercial architecture. The students will learn architectural design as well as basic structural and civil engineering requirements for commercial construction, including drawing techniques and materials. The students will learn about building codes and how they apply to commercial construction. The students will be able to design a commercial building…retail center, etc. and produce a detailed set of construction documents for that building.

It is highly recommended that students have minimum two units of mathematics with an emphasis on Algebra, Geometry and/or Trigonometry. Good math skills are essential.

**EARLY CHILDHOOD CAREERS**

Prerequisite: prior Child Development course recommended

1 or 2 year program; 3 units of credit per year

This course will prepare students for employment in early childhood education and related services while providing the foundations for study in higher education that lead to early childhood education and other child-related careers.

Students will evaluate leadership, citizenship, and teamwork skills required for success in early childhood industry. During the program students will analyze career opportunities and identify personal traits needed within early childhood careers. They will examine types of early childhood programs, be able to describe areas of child development, and demonstrate a safe and healthy learning environment. They will practice appropriate child guidance and behavior management techniques. The students will be taught CPR techniques for infants and small children, other basic first-aid methods, nutritional planning, and proper meal preparation in the childcare setting. Students will meet content knowledge requirements for the CDA (Child Development Associate) credential. Students will have the opportunity to earn a CDA by completing the full two years of the program.

Students must have a TB test and a criminal background check to be placed on rotations the second half of the year.

**ELECTRICAL TRADES**

Prerequisite: Algebra with a “C” or higher

Read at or above Grade Level

2 year program; 3 units of credit per year

This course will teach students to identify, install, and troubleshoot electrical wiring and associated devices that are commonly used in both residential and commercial environments. Students will participate in the construction of a new house. The program includes switches, receptacles, lighting, low voltage communications wiring, service installation, and other wiring associated with residential electricity. Students will also learn fundamental commercial wiring including Start – Stop Stations, single and 3 phase motors, and transformers.

Students must be physically fit and capable of working under adverse weather conditions including both very hot and freezing cold. We work during all types of weather on the school house. We work with real circuits, so the ability to abide by strict safety rules is extremely important. An aptitude for math in general and algebra in particular is required, as is an aptitude to read and produce technical documents and drawings.

**HEALTH OCCUPATIONS & HEALTH RELATED OCCUPATIONS**

The Health/Health Related Occupations courses offer learning experiences for juniors and seniors in high school designed to create or further stimulate their interest in the many career opportunities available in the health field. This course is designed to be challenging and meet the needs of all learning styles. The student will learn beginning skills and the basic procedures needed for an entry-level job and a sound basis for continuing their education in the medical field.

The first semester involves classroom theory, demonstrations and practice. During the second semester, students begin to draw upon previously acquired knowledge and basic skills by applying them to various health services through supervised clinical observations and experiences. Students must have an up to date immunization record, a TB test, a urine drug screen, a criminal background check, a flu vaccine, and maintain a 75% average and 90% attendance to remain in the program and be placed in clinical rotations. Students are placed in clinical rotations Monday through Thursday and continue classroom work on Fridays.
HEATING, VENTILATION AND AIR CONDITIONING (HVAC)  2 year program; 3 units of credit per year
Prerequisite: Algebra

This course will provide students with training in heating, ventilation, air conditioning, and refrigeration to qualify them for employment as an apprentice or helper assistant to an A/C mechanic in service and/or installation of equipment.

The course will cover tool selection and use, tubing, piping, brazing, soldering and basics of compression, refrigeration and air conditioning & heating systems. Electric circuits and components, troubleshooting, basic sheet metal, customer relations, and preparation for the EPA exam will also be covered.

Applicants should have a good mechanical aptitude and be able to understand both written and verbal instructions. Students should be in good physical condition and free from respiratory problems.

POWER EQUIPMENT TECHNOLOGY  1 and/or 2 year program; 3 units of credit per year
College credit can be purchased through The University of Central Missouri (optional)

This program prepares juniors and/or seniors to diagnose and repair two- and four-cycle engines on such equipment as lawn mowers, chainsaws, roto tillers, edgers and trimmers. Power equipment instruction ranges from home-use equipment to commercial equipment.

Students will learn to adjust, clean, lubricate and when necessary replace worn or defective parts such as spark plugs, ignition parts, valves and carburetors. Other skills taught include wheel alignment, deck repair, blade balancing, blade and chain sharpening, battery testing and electrical repair. Troubleshooting and problem solving on all types of equipment are stressed.

Good reading skills are required, as students will need to be able to refer to service manuals for detailed directions.

APPLIED RETAIL AND BUSINESS SKILLS  1 and/or 2 year program; 3 units of credit per year

This course is designed for juniors or seniors with special needs who have an interest in the retail industry. A prerequisite for the course is potential ability to work in competitive employment.

This is an active, hands-on, multimedia approach that emphasizes instructional strategies that are successful with special needs populations. The program has three phases: operating a fully functional store on the Lewis & Clark campus, paired with classroom instruction, community-based transition (job shadowing) and a possible independent internship experience for those that meet the challenges of the first two phases.

The students in the Applied Retail and Business program rotate through the following stations in the school store: cashier, inventory control, maintenance, bookkeeper, food preparation, and food manager. The classroom instruction includes lessons on self-awareness, social skills, communication skills, and employability skills.

Skills learned in the classroom are reinforced through the community-based transition phase. During this time, the student job shadows at participating stores. Those students that qualify for the independent internship will be eligible for placement within the community with minimal supervision. The remaining students will complete their internships within the Lewis & Clark Store with continued supervision; with the emphasis on job readiness and work hardening skills, along with a heavier workload and increased responsibilities.

COMBINATION WELDING  2 year program; 3 units of credit per year
Prerequisite: Asthma Free

Combination welding is open to students interested in welding and metal working as an occupation. Students are instructed in shop safety and the proper procedures for each welding process. Oxy fuel cutting, arc, mig and tig welding, plasma cutting, and air arc cutting processes are taught in all four weld positions and on the five basic weld joints. Metallurgy, blueprint reading, reading a tape measure, metal fabricating techniques and weld symbols
are included in the program.

The lab is set up to simulate the welding industry. Students are evaluated by written tests and by testing their welds as specified by the American Welding Society code.

Students interested in a career in welding should have good eye/hand coordination, mechanical aptitude, manual dexterity, freedom from asthma, allergies and physical disabilities which prevent bending, stooping, lifting and working in awkward positions.
