

# Acute Concussion Short Term Care

To be completed by student's Physician/Nurse Practitioner/Physician Assistant

Form adapted from NYSSHSC

Student Name \_\_\_\_\_ Date of Birth \_\_\_\_\_ Grade \_\_\_\_\_

Date of Injury \_\_\_\_\_ Sport/Activity \_\_\_\_\_

Expected Date of Return to School \_\_\_\_\_

**The above student has been identified as symptomatic consistent with an acute concussion. The academic planning team may need to consider the following *short term academic supports* for proper concussion management in school (checked items apply). Implementation will be determined by the academic planning team:**

- No specific educational modifications are indicated (Return to Learn)
- Shortened day or modified schedule as determined
- Extra time to complete coursework, assignments, tests or modified tasks in the classroom
- Limits to number of tests required within a single school day or no test
- Limit or modify homework requirements to allow adequate cognitive rest time or no homework
- Rest breaks within the day as needed at onset of headache
- Allow nursing assessment for student complaints, especially with headache. Headaches occurring post-concussive incident would indicate that the student should not be driving and symptom related school dismissal will require parent transport
- No outdoor or indoor running or active contact play

**The above student should adhere to the following recommendations regarding physical education (PE) and athletic participation (checked items apply):**

- Is medically cleared to participate in Physical Education (PE) within the school program
- Is medically cleared to participate in sports/athletics
- May not return to PE until further notice
- May not return to sports/athletics until further notice
- May gradually return\* to physical activity under the supervision of an appropriate person (e.g. athletic trainer, coach or physical education teacher). \*Return to play should occur in gradual steps as listed below:
  1. Begin with aerobic exercise only to increase heart rate (walking, light jogging, and stationary cycling, light weight lifting – low weight, higher reps, no bench, no squat)
  2. Work to increase heart rate with body/head movement (jogging, brief running, moderate intensity stationary biking, moderate intensity weightlifting – reduced time and reduced weight from typical routine)
  3. Move on to heavy non-contact physical activity (sprinting/running, high intensity stationary biking, regular weightlifting routine, non-contact sport specific drills (in 3 planes of movement)
  4. Return to full contact in controlled practice (before return to full contact in game play).
  5. Return to full contact in game play on or after \_\_\_\_\_

\*Students: pay careful attention to your symptoms, including thinking and concentration skills, at each stage of activity. You should only move on to the next level of activity when you do not experience any symptoms during or after the activity for 2-3 days at the current level. If symptoms do return, please contact me for further medical advice.

**These recommendations will be reviewed and updated on \_\_\_\_\_.**

Health Care Provider Signature \_\_\_\_\_ Date \_\_\_\_\_

Printed Name \_\_\_\_\_ Telephone \_\_\_\_\_ Fax \_\_\_\_\_

**Parent authorization for school nurse/other staff to exchange information with the health care provider (located on back) must be completed for school review and implementation of Acute Concussion Short-term Care .**
