

Safety of Building and Grounds

Section 1. General. EACS Administration will continually strive to provide a safe environment for students attending East Allen County Schools. All buildings and grounds will be inspected periodically to discover and correct any safety, health, or code violations that may exist.

Section 2. Inspection. East Allen County Schools buildings and grounds shall be inspected periodically by the building administrator, Director of Facilities, and/or insurance carriers to assure that hazards to student and staff safety are eliminated. If for any reason it is not possible to correct a hazardous situation, it is to be reported in writing to the Director of Facilities for action.

Section 3. Facility Rules. The Director of Facilities will provide written rules for building administrators to follow in order to eliminate potentially dangerous areas in school buildings and grounds. These rules will include, but not be limited to, such items as: extension cords, step ladders, fire extinguishers, blocking of fire exits, combustibles,

1. proper use of extension cords;
2. proper use of step ladders;
3. proper use of fire extinguishers;
4. rules prohibiting blocking of fire exits;
5. rules regarding use of and handling of combustibles;
6. rules prohibiting the placement of any item whatsoever on any heating or air conditioning unit; and
7. all other rules regarded by the Director as necessary for the safe and efficient operation of all school buildings.
